

KAKARAPARTI BHAVANARAYANA COLLEGE (AUTONOMOUS)

KOTHAPETA, VIJAYAWADA - 520001

COURSE OUTCOMES

ACADEMIC YEAR - 2022-2023

DEPARTMENT OF BOTANY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc. CBZ	First semester	Fundamentals of Microbes and Non-vascular Plants	R20BOT101A	2022-2023	<ul style="list-style-type: none"> ✓ Explain origin of life on the earth. ✓ Classify fungi, lichens, algae and bryophytes based on their structure, reproduction and life cycles. ✓ Analyze and ascertain the plant disease symptoms due to viruses, bacteria and fungi. ✓ Recall and explain the evolutionary trends among amphibians of plant kingdom for their shift to land habitat. ✓ Evaluate the ecological and economic value of microbes, thallophytes and bryophytes.
I B.Sc. CBZ	Second Semester	Basics of Vascular plants and Phytogeography	R20BOT201A	2022-2023	<ul style="list-style-type: none"> ✓ Classify and compare pteridophytes and Gymnosperms based on their morphology, anatomy, reproduction and life cycles. ✓ Demonstrate the process of fossilization and compare the characteristics of extinct and extant plants. ✓ Apply various taxonomical aids for identification of Angiosperms. ✓ Analyze the morphology of the most common Angiosperm plants of their localities and recognize their families. ✓ Identify the different phytogeographical regions of the world and can analyse their floristic wealth.
II B.Sc. CBZ	Third semester	Anatomy and Embryology of Angiosperms, Plant Ecology and Biodiversity	R20BOT301	2021-2022	<ul style="list-style-type: none"> ✓ Understand the organization of tissues and tissue systems in plants. ✓ Understand the basic concepts of plant ecology, and evaluate the effects of environmental and biotic factors

					<p>on plant communities.</p> <ul style="list-style-type: none"> ✓ Correlate the importance of biodiversity and consequences due to its loss. ✓ Illustrate and interpret various aspects of embryology. ✓ Enlist the endemic/endangered flora and fauna from two biodiversity hot spots in India and assess their strategies of conservation.
II B.Sc. CBZ	Fourth Semester	Plant Physiology and Metabolism	R20BOT401	2021- 2022	<ul style="list-style-type: none"> ✓ Evaluate the role of minerals in plant nutrition and their deficiency symptoms. ✓ Interpret the role of enzymes in plant metabolism. ✓ Critically understand the light reactions and carbon assimilation processes responsible for synthesis of food in plants. ✓ Analyze the biochemical reactions in relation to Nitrogen and lipid metabolisms. ✓ Evaluate the physiological factors that regulate growth and development in plants.
II B.Sc. CBZ	Fourth Semester	Cell Biology, Genetics and Plant Breeding	R20BOT402	2021- 2022	<ul style="list-style-type: none"> ✓ Explain the procedures of selection and hybridization for improvement of crops. ✓ Understand the basics of Mendelian genetics, its variations and interpret inheritance of traits in living beings. ✓ Evaluate the structure, function and regulation of genetic material. ✓ Understand the applications, principles and modern techniques in plant breeding. ✓ Explain the organization of a eukaryotic chromosome and the structure of genetic material.
III B.Sc.	Fifth	Plant Propagation	R20BOTA501	2022-	<ul style="list-style-type: none"> ✓ Explain various plant propagation structures and their

CBZ	Semester			2023	<p>utilization.</p> <ul style="list-style-type: none"> ✓ Understand advantages and disadvantages of vegetative, asexual and sexual plantpropagation methods. ✓ Assess the benefits of asexual propagation of certain economically valuable plants using apomictics and adventive polyembryony. ✓ Demonstrate skills related to vegetative plant propagation techniques such as cuttings, layering, grafting and budding. ✓ Apply a specific macro-propagation technique for a given plant species.
III B.Sc. CBZ	Fifth Semester	Seed Technology	R20BOTA502	2022- 2023	<ul style="list-style-type: none"> ✓ Explain the causes for seed dormancy and methods to break dormancy. ✓ Understand critical concepts of seed processing and seed storage procedures. ✓ Acquire skills related to various seed testing methods. ✓ Identify seed borne pathogens and prescribe methods to control them. ✓ Understand the legislations on seed production and procedure of seed certification.

DEPARTMENT OF ZOOLOGY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc. CBZ	I	BIOLOGY OF NON- CHORDATES	R20ZOO101A	2021-22	<p>On completion of this course, students will have the knowledge and skills to:</p> <ul style="list-style-type: none"> ○ Describe the variety of invertebrate organisms and explain their evolutionary origin and diversification. ○ Investigate invertebrates in laboratory and field conditions and identify major taxonomic groups. ○ Understand and communicate the major evolutionary innovations in invertebrate groups. ○ Describe the functional significance of associated morphologies and behaviors.
I B.Sc. CBZ	II	BIOLOGY OF CHORDATES	R20ZOO201A	2021-22	<ul style="list-style-type: none"> ○ Understand the evolution of chordates including their phylogeny and the modification of key innovations and homologous structures ○ Identify and describe the defining characteristics of the major vertebrate classes as well as hemi- and proto chordates. ○ Describe the major architectural features of the integumentary, skeletal, nervous, muscular, digestive, respiratory, circulatory, excretory and reproductive systems. ○ Develop an understanding of the application of comparative anatomy in current scientific methods.
II B.Sc. CBZ	III	CELL BIOLOGY, GENETICS, MOLECULAR BIOLOGY AND EVOLUTION	R20ZOO301A	2021-22	<ul style="list-style-type: none"> ○ To understand the basic unit of the living organisms and to differentiate the organisms by their cell structure and to describe fine structure and function of plasma membrane and different cell organelles of eukaryotic cell. ○ To understand the history of origin of branch of genetics, gain

					<p>knowledge on heredity, interaction of genes, various types of inheritance patterns existing in animals</p> <ul style="list-style-type: none"> ○ Acquiring in-depth knowledge on various aspects of genetics involved in sex determination, human karyotyping and mutations of chromosomes resulting in various disorders ○ Understand the central dogma of molecular biology and flow of genetic information from DNA to proteins. ○ Understand the principles and forces of evolution of life on earth, the process of evolution of new species and apply the same to develop new and advanced varieties of animals for the benefit of the society.
II B.Sc. CBZ	IV	ANIMAL PHYSIOLOGY, CELLULAR METABOLISM AND EMBRYOLOGY	R20ZOO401A	2021-22	<ul style="list-style-type: none"> ○ Understand the functions of important animal physiological systems including digestion, cardio-respiratory and renal systems. ○ Understand the muscular system and the neuro-endocrine regulation of animal growth, development and metabolism with a special knowledge of hormonal control of human reproduction. ○ Describe the structure, classification and chemistry of biomolecules and enzymes responsible for sustenance of life in living organisms ○ Develop broad understanding the basic metabolic activities pertaining to the catabolism and anabolism of various biomolecules ○ Describe the key events in early embryonic development starting from the formation of gametes upto gastrulation and formation of primary germ layers.
II B.Sc. CBZ	IV	IMMUNOLOGY AND ANIMAL BIOTECHNOLOGY	R20ZOO402A	2021-22	<ul style="list-style-type: none"> ○ To provide students with a foundation in immunological processes ○ To be able to compare and contrast the innate versus adaptive

					<p>immune systems and humoral versus cell-mediated immune responses</p> <ul style="list-style-type: none"> ○ Understand the significance of the Major Histocompatibility Complex in terms of immune response and transplantation ○ To provide knowledge on animal cell and tissue culture and their preservation ○ To empower students with latest biotechnology techniques like stem cell technology, genetic engineering, hybridoma technology, transgenic technology and their application in medicine and industry for the benefit of living organisms.
III B.Sc. CBZ	V	SUSTAINABLE AQUACULTURE MANAGEMENT	R20ZOO501	2021-22	<ul style="list-style-type: none"> ○ Understand why there is a need for fisheries management and regulation. ○ Be able to understand the various problems to be faced in maintaining water quality. ○ Be able to analyse and discuss how different types of regulations affect economic behaviour. ○ Be familiar with the feed formulation and feed storage. ○ Know the relevant markets for fish and aquaculture products, know how these markets work and how they affect production.
III B.Sc. CBZ	V	POST HARVEST TECHNOLOGY OF FISH AND FISHERIES	R20ZOO502	2021-22	<ul style="list-style-type: none"> ○ Learn the importance of proper handling methods and timing of fish crops to obtain maximum benefit from aquaculture. ○ Use methods to prevent spoilage of fish and its products by preservation and processing. ○ Realise that no part of fish is waste and most of it can be recovered as useful by product ○ Know that an integrated approach by the aqua culturist, harvester and processor of aqua products is essential to obtain superior quality products.

DEPARTMENT OF COMPUTER SCIENCE

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I BCA	I	Computer Fundamentals and Office Tools	R20BCA101A	2022-2023	<ol style="list-style-type: none">1. Identify categories of programs, system software and applications. Organize and work with files and folders.2. Compose, format and edit a word document and working with macros.3. Create work sheets and using various functions.4. Make presentations and inserting multimedia in them.5. Describe the usage of computers and why computers are essential components in business and society.
I BCA	I	Programming with 'C'	R20BCA102A	2022-2023	<ol style="list-style-type: none">1. To learn about data types and operators.2. To learn about decision making statements and functions3. To learn how to work with arrays and strings and structures.4. To understand character arrays and concept of pointers.5. To understand the concept of files.
I BCA	II	Data base management system	R20BCADBMS201	2022-23	<ol style="list-style-type: none">1. An ability to apply Knowledge of computing and mathematics in Computer Science & Engineering.2. An ability to analyze a problem, identify and define the computing requirements appropriate to its solution.3. An ability to design, implement and evaluate a computer-based system to meet desired needs with appropriate societal

					<p>considerations.</p> <ol style="list-style-type: none"> An ability to conduct investigations, interpret data and provide conclusions in investigating complex problems related to Computer Science & Engineering. An ability to engage in continuing professional development and life-long learning.
I BCA	II	Data structures	R20BCA202A	2022-2023	<ol style="list-style-type: none"> Ability to analyze algorithms and algorithm correctness. Ability to summarize searching and sorting techniques Ability to describe stack, queue and linked list operation. Ability to describe linked list operation. Ability to have knowledge of tree and graphs concepts
I BCA	II	PYTHON PROGRAMMING	R20BCA203A	2022-2023	<ol style="list-style-type: none"> To understand the Basics of python language and Python IDLE. and Install and run python Interpreter. To gain knowledge about different data types and operators. To use and explore control structures and loop constructs in python. To import and create arrays using array module. To explore the use of Lambdas, List, Tuples.
II BCA	III	Object Oriented Programming through JAVA	R20BCA301	2021-2022	<ol style="list-style-type: none"> Demonstrate good object-oriented programmingskillsinJava Ableto describe,recognize, applyand implementsected design patterns in Java Understand thecapabilities and limitations of Java

					<ul style="list-style-type: none"> 4. Be familiar with common errors in Java and its associated libraries 5. Develop excellent debugging skills
II BCA	III	Operating Systems	R20BCA30 2	2021-2022	<ul style="list-style-type: none"> 1. An ability to understand basic concepts of operating system. 2. An ability to understand linux shell and scheduling. 3. An ability to analyze memory management and deadlocks. 4. An ability to describe memory management and concurrency control mechanisms. 5. An ability to compare various file systems
II BCA	IV	Cyber Laws	R20BCA40 1	2021-2022	<ul style="list-style-type: none"> 1. Critically evaluate ongoing developments in law relating to information technologies. 2. Display an understanding of how these developments relate to one another. 3. Examine areas of doctrinal and political debate surrounding rules and theories; 4. Evaluate those rules and theories in terms of internal coherence and practical outcomes. 5. Draw on the analysis and evaluation contained in primary and secondary sources.
II BCA	IV	DATA MINING AND WAREHOUSING	R20BCA402	2021-2022	<ul style="list-style-type: none"> 1. Examine the types of the data to be mined and present a general classification of tasks and primitives to integrate a data mining system.

					<ol style="list-style-type: none"> 2. Apply pre-processing statistical methods for any given raw data 3. Discover interesting patterns from large amounts of data to analyse and extract patterns to solve problems, make predictions of outcomes 4. Comprehend the roles that data mining plays in various fields and manipulate different data mining techniques 5. Select and apply proper data mining algorithms to build analytical applications. 6. Evaluate and implement a wide range of emerging and newly-adopted methodologies and technologies to facilitate the knowledge discovery
II B.C.A	IV	Web Programming	R20BCA403	2021-2022	<ol style="list-style-type: none"> 1. Able to use Building Blocks of PHP, Access array elements. 2. Able to use various functions and handle data using files.. 3. Able to use working with Forms, Sessions, Cookies. 4. Able to implement Java Script. 5. Able to implement basic concepts of Angular JS for Web development.
II B.C.A	IV	DESIGN OF OBJECT ORIENTED APPLICATIONS	R20BCA404	2021-2022	<ol style="list-style-type: none"> 1. Have Knowledge in micro and macro process. 2. Have Knowledge in management planning, quality assurance and metrics along with documentation of object oriented development. 3. Have Knowledge in system architecture. 4. Basic knowledge in AI and Data Acquisition.

					5. Knowledge in applications of Object Oriented Design.
II B.C.A	IV	DATA ANALYTICS USING R	R20BCA405	2021-2022	<ol style="list-style-type: none"> 1. Data-Visualization tools and techniques offer executives and other knowledge workers new approaches to dramatically improve their ability to grasp information hiding in their data. 2. Data visualization is a general term that describes any effort to help people understand the significance of data by placing it in a visual context. 3. Patterns, trends and correlations that might go undetected in text-based data can be exposed and recognized easier with data visualization software. 4. It isn't just the attraction of the huge range of statistical analyses afforded by R that attracts data people to R. The language has also developed a rich ecosystem of charts, plots and visualizations over the years. 5. ggplot2 is a data visualization package for the statistical programming language R
II B.C.A	IV	Object Oriented Software Engineering	R20BCA406	2021-2022	<ol style="list-style-type: none"> 1. Explain the motivation for and development of object-oriented programming languages. 2. Produce a set of use cases given a problem statement. 3. Produce class diagrams, object interaction diagrams and object state transition diagrams for a given problem. 4. Describe the essential features of an object-oriented programming

					<p>language.</p> <ol style="list-style-type: none"> 5. Produce and/or debug code fragments that illustrate principles of object-oriented software development. 6. Describe the principles for testing object-oriented software and derive sets of test data given a specification.
III BCA	V	MACHINE LEARNING USING PYTHON	R20BCA50 1	2022-2023	<ol style="list-style-type: none"> 1. Identify the characteristics of machine learning.(Understand- L2) 2. Summarize the Model building and evaluation approaches(Understand- L2) 3. Apply Bayesian learning and regression algorithms for real-world Problems.(Apply- L3) 4. Apply supervised learning algorithms to solve the real-world Problems. (Apply- L3) 5. Apply unsupervised learning algorithms for the real world data. (Apply- L3)
III BCA	V	DIGITAL IMAGING	R20BCA50 2	2022-2023	<ol style="list-style-type: none"> 1. Gain knowledge about Types of Graphics, Types of Objects, Types of video editing tools 2. Show their skills in editing and altering photographs for through a 3. Basic understanding of the tool box. 4. Gain knowledge in using the layers. 5. Gain knowledge in using the selection tools, repair tools. 6. Gain knowledge in using selection tools , applying filters and can

					show their skills.
III BCA	V	CYBER SECURITY AND MALWARE ANALYSIS	R20BCA50 3	2022-2023	<ol style="list-style-type: none"> 1. Understand the computer networks, networking tools and cyber security 2. Learn about NIST Cyber Security Framework 3. Understand the OWASP Vulnerabilities 4. Implement various Malware analysis tools 5. Understand about Information Technology act 2000
III BCA	V	Selenium	R20BCA50 4	2022-2023	<ol style="list-style-type: none"> 1. Selenium is a free automation testing tool for web applications. 2. It is able to work with different browsers like Chrome, Firefox, IE, Opera and simulate human like behaviour. 3. Selenium is able to interact with all the different elements in a webpage. It can click on them, input text, extract text and much more. By covering all the different functionalities on your website with Selenium tests, you will be able to quickly catch new and reappearing old bugs. This will save your time and money. 4. We can run our test cases on various environments using selenium grid . 5. we can integrate with project management tools for managing the projects
III B.C.A	V	MOBILE APPLICATION DEVELOPMENT	R20BCA505	2022-23	<ol style="list-style-type: none"> 1. Identify basic terms ,tools and software related to android systems 2. Describe components of IDE, understand features of android development tools

					<ol style="list-style-type: none"> 3. Describe the layouts and controls 4. Explain the significance of displays using the given view 5. Explain the features of services and able to publish android Application 6. Developing interesting Android applications using MIT App Inventor.
III B.C.A	V	JAVA Full Stack Development	R20BCA506	2022-23	<ol style="list-style-type: none"> 1. Building Strong expertise to develop front end application using HTML5 2. Building Strong expertise to develop front end application using CSS3 3. To become proficient in Bootstrap concepts and To develop a web pages based on Bootstrap 4. Implementation of web application employing efficient database access. 5. Develop a fully functioning website and deploy on a web server.
B.Sc(MPCS, MECS, MSCS, MCCS, DATA SCIENCE , IOT)	I	Programming with 'C'	R20-CSC101A	2022-2023	<ol style="list-style-type: none"> 1. To learn about data types and operators. 2. To learn about decision making statements and functions 3. To learn how to work with arrays and strings and structures. 4. To understand character arrays and concept of pointers. 5. To understand the concept of files.
I B.Sc(MPCS,M	II	PROGRAMMING with JAVA	R20-CSC201A	2022-2023	<ol style="list-style-type: none"> 1. To learn Object-Oriented programming concepts and techniques using the Java programming language.

ECS, MSCS, MCCS)					<ol style="list-style-type: none"> 2. To learn to write, test, and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important workforce activities: 3. Design/Develop Program 4. Design classes ,interfaces, packages 5. Use multithreading concepts to develop inter process communication. 6. Design the applet program 7. Understanding Inheritance.
II BSc(MPCs, MECs, MSCs, MCCs)	III	DATABASE MANAGEMENT SYSTEMS	R20BSC301	2021-2022	<ol style="list-style-type: none"> 1. Gain knowledge of Database and DBMS. 2. Understand the fundamental concepts of DBMS with special emphasis on relational data model. 3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database 4. Model database using ER Diagrams and design database schemas based on the model. 5. Create a small database using SQL. 6. Store, Retrieve data in database.
II BSc(MPCs, MECs, MSCs, MCCs)	IV	DATA STRUCTURES USING C	R20BSC401	2021-2022	<ol style="list-style-type: none"> 1. Understand available Data Structures for data storage and processing.

					<ol style="list-style-type: none"> 2. Comprehend Data Structure and their real-time applications - Stack, Queue, LinkedList, Trees and Graph 3. Choose a suitable Data Structures for an application 4. Develop ability to implement different Sorting and Search methods 5. Have knowledge onData Structures basic operations like insert, delete, search,updateand traversal 6. Design and develop programs using various data structures Implement the applications of algorithms for sorting, pattern matching etc
II BSc(MPCs, MECs, MSCs, MCCs)	IV	Operating Systems	R20BSC402	2021-2022	<ol style="list-style-type: none"> 1. Know Computer system resources and the role of operating system in resource management with algorithms 2. Understand Operating System Architectural design and its services. 3. Gain knowledge of various types of operating systems including Unix and Android. 4. Understand various process management concepts including scheduling, synchronization, and deadlocks. 5. Have a basic knowledge about multithreading.

					<ol style="list-style-type: none"> 6. Comprehend different approaches for memory management. 7. Understand and identify potential threats to operating systems and the security features design to guard against them. 8. Specify objectives of modern operating systems and describe how operating systems have evolved over time. 9. Describe the functions of a contemporary operating system
III B.Sc(MPCS,M ECS,MSCS,M CCS)	V	Web Interface Designing Technologies	R20ABSC501	2022-23	<ol style="list-style-type: none"> 1. Understand and appreciate the web architecture and services. 2. Gain knowledge about various components of a website. 3. Demonstrate skills regarding creation of a static website 4. Interface to dynamic website. 5. Learn how to install word press and gain the knowledge of installing various plugins to use in their websites.
III B.Sc (MPCS,MECS, MSCS,MCCS)	V	Web Applications Development using PHP & MYSQL	R20ABSC502	2022-2023	<ol style="list-style-type: none"> 1. Write simple programs in PHP. 2. Understand how to use regular expressions, handle exceptions, and validate data using PHP. 3. Apply In-Built functions and Create User defined functions in PHP programming. 4. Write PHP scripts to handle HTML forms. 5. Write programs to create dynamic and interactive web based applications using PHP and MYSQL. 6. Know how to use PHP with a MySQL database and can write database driven web pages

B.Sc (DATA SCIENCE , IOT)	I	Programming with 'C'	R20-CSC101A	2022-2023	<ol style="list-style-type: none"> 1. To learn about data types and operators. 2. To learn about decision making statements and functions 3. To learn how to work with arrays and strings and structures. 4. To understand character arrays and concept of pointers. 5. To understand the concept of files.
B.Sc(DATA SCIENCE,IOT)	II	Data structures	R20-DSIOT201A	2022-2023	<ol style="list-style-type: none"> 1. Ability to analyze algorithms and algorithm correctness. 2. Ability to summarize searching and sorting techniques 3. Ability to describe stack, queue and linked list operation. 4. Ability to describe linked list operation. 5. Ability to have knowledge of tree and graphs concepts
DATA SCIENCE	II	Intro.to R programming	R20DSRP201A	2022-23	<ol style="list-style-type: none"> 1. Recognize the various disciplines that contribute to a successful data science effort. and Understand the processes of data science identifying the problem to be solved, data collection, preparation, modeling, evaluation and visualization. 2. Be aware of the challenges that arise in data sciences. 3. Develop an appreciation of the many techniques for data modeling and mining. 4. Be cognizant of ethical issues in many data science tasks. 5. Be comfortable using commercial and open source tools such as the R language and its associated libraries for data analytics and visualization.

II DATA SCIENCE	III	OOPs with JAVA	DSOJ301	2019-20	<ol style="list-style-type: none"> 1. To learn Object-Oriented programming concepts and techniques using the Java programming language. 2. To learn to write, test, and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important workforce activities: 3. Design/Develop Program 4. Design classes ,interfaces, packages 5. Design the applet programs 6. Understanding Inheritance.
II B.Sc. (DATA SCIENCE)	III	DATA MINING AND DATA ANALYSIS	DSDMD301	2019-20	<ol style="list-style-type: none"> 1. Compare various conceptions of data mining as evidenced in both research and application. 2. Characterize the various kinds of patterns that can be discovered by association rule mining. 3. Evaluate mathematical methods underlying the effective application of data mining.
II IOT	III	PROGRAMING WITH PYTHON	IOTOP301	2019-20	<ol style="list-style-type: none"> 1. To understand the Basics of python language and Python IDLE. 2. To gain problem solving capability. 3. To Install and run python Interpreter. 4. To gain knowledge about different data types and operators. 5. To use and explore control structures and loop constructs in python.

					<ol style="list-style-type: none"> 6. To understand and create built in and user defined datatypes. 7. To identify the various form of input and output statements and its purposes 8. To import and create arrays using array module. 9. To insert predefined functions and operations on array. 10. To understand the basics of numpy module and importing the functions from numpy module. 11. To gain knowledge about multidimensional array and its link with numpy module. 12. To understand and use the concept declaring functions and returning results from a function. 13. To explore the use of Lambdas, List, Tuples.
II Data Science	IV	Advanced Java	DSAJ401	2019-20	<ol style="list-style-type: none"> 1. To understand the meaning and basic components of servlets and JSP 2. To know the required software to run Java programs 3. Understanding the use of servers 4. Understanding the use of Jsp 5. Understanding the use of Databases
II DATA SCIENCE	IV	DATA PROCESSING & VISUALIZAT	DS-CSC402	2020-2021	<ol style="list-style-type: none"> 1. proficiently navigate Tableau using a full suite of commands 2. analyse data and calculate with tables using Tableau commands 3. generate the most meaningful visualisations 4. develop interactive dashboards

		ION			deliver insightful stories visually in addressing a business problem.
II BSc(Data Science)	IV	DATABASE MANAGEMENT SYSTEMS	DSDBMS403	2021-2022	<ol style="list-style-type: none"> 1. Gain knowledge of Database and DBMS. 2. Understand the fundamental concepts of DBMS with special emphasis on relational data model. 3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database 4. Model database using ER Diagrams and design database schemas based on the model. 5. Create a small database using SQL. 6. Store, Retrieve data in database.
B.Sc (Data Science)	IV	ARTIFICIAL INTELLIGENCE	DSAI404	2021-2022	<ol style="list-style-type: none"> 1. Find appropriate idealizations for converting real world problems into AI search problems formulated using the appropriate search algorithm. . 2. Implement CNN 3. Implement RNN. 4. It is expected that the students to apply techniques to design expert systems. 5. Understand the Basic Concepts
II IOT	IV	PROGRAMMING WITH 'R'	IOTPR401	2019-20	<ol style="list-style-type: none"> 1. List motivation for learning a programming language 2. Access online resources for R and import new function packages into the R workspace

					<ol style="list-style-type: none"> 3. Import, review, manipulate and summarize data-sets in R 4. Explore data-sets to create testable hypotheses and identify appropriate statistical tests 5. Perform appropriate statistical tests using R Create and edit visualizations with
II BSc(IoT)	IV	DATABASE MANAGEMENT SYSTEMS	IOTDBMS402	2021-2022	<ol style="list-style-type: none"> 1. Gain knowledge of Database and DBMS. 2. Understand the fundamental concepts of DBMS with special emphasis on relational data model. 3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database 4. Model database using ER Diagrams and design database schemas based on the model. 5. Create a small database using SQL. 6. Store, Retrieve data in database.
III DATA SCIENCE / III IOT	V	Machine Learning	R20DSML5 01 / R20IOTML 501	2022-2023	<ol style="list-style-type: none"> 1. Domain Knowledge for Productive use of Machine Learning and Diversity of Data. 2. Demonstrate on Supervised and Computational Learning 3. Analyze on Statistics in learning techniques and Logistic Regression 4. Illustrate on Support Vector Machines and Perceptron Algorithm 5. Design a Multilayer Perceptron Networks and classification of decision tree

III Data Science/ III IoT	V	PHP & MySQL	R20DSPHP 502/ R20IOTPH P502	2022-2023	<ol style="list-style-type: none"> 1. To understand the meaning and basic components of PHP 2. To know the required software to run PHP programs 3. Understanding the use of servers and predefine databases 4. To design front end applications 5. To design web applications
B.Sc (Data Science)	V	Big Data Technology	R20DSBT503	2022-2023	<ol style="list-style-type: none"> 1. Learn tips and tricks for Big Data use cases and solutions. 2. Learn to build and maintain reliable, scalable, distributed systems with Apache Hadoop. 3. Able to apply Hadoop ecosystem components. 4. Understand database concept 5. Maintain website data.
B.Sc (Data Science)	V	PYTHON PROGRAMMING	R20DSPP504	2022-2023	<ol style="list-style-type: none"> 1. To understand the Basics of python language and Python IDLE. 2. To gain problem solving capability. 3. To Install and run python Interpreter. 4. To gain knowledge about different data types and operators. 5. To use and explore control structures and loop constructs in python. 6. To understand and create built in and user defined datatypes. 7. To identify the various form of input and output statements and its purposes 8. To import and create arrays using array module.

					<ol style="list-style-type: none"> 9. To insert predefined functions and operations on array. 10. To understand the basics of numpy module and importing the functions from numpy module. 11. To gain knowledge about multidimensional array and its link with numpy module. 12. To understand and use the concept declaring functions and returning results from a function. 13. To explore the use of Lambdas, List, Tuples.
B.Voc [Web Technology & Software Development]	I	Computer Fundamentals& MS Office	R20WSCSC101A	2022-2023	<ol style="list-style-type: none"> 1. To understand the fundamentals of computers. 2. To learn about memory and its types. 3. To learn different number systems and their conversions. 4. To learn about operating system, its functions and its types. 5. To understand the concepts of MS Word, Excel, PowerPoint concepts.
B.Voc [Web Technology & Software Development]	I	Computer Organization	R20WSCO101A	2022-2023	<ol style="list-style-type: none"> 1. Understand the basics of computer hardware and how software interacts with computer hardware and Analyze and evaluate computer performance 2. Understand how computers represent and manipulate data and Understand computer arithmetic and convert between different number systems 3. Assemble a simple computer with hardware design including data format, instruction format, instruction set, addressing

					<p>modes, bus structure, input/output, memory, arithmetic/logic unit, control unit, and data, instruction and address flow</p> <ol style="list-style-type: none"> Use Boolean algebra as related to designing computer logic, through simple combinational and sequential logic circuits The course emphasizes performance and cost analysis, memory technology, memory hierarchy, virtual memory management, and i/o systems.
B.VOC[IT&IT eS]	I	Introduction to 'C' Language	R20ITCP101A	2022-2023	<ol style="list-style-type: none"> To learn about data types and operators. To learn about decision making statements and functions To learn how to work with arrays and strings and structures. To understand character arrays and concept of pointers. To understand the concept of files.
I B.VOC WT &SD	I	HTML & CSS	R20WSHC101 A	2022-2023	<ol style="list-style-type: none"> Analyze a web page and identify its elements and attributes. Create web pages using XHTML and Cascading Style Sheets. Build dynamic web pages using JavaScript (Client side programming). Create XML documents and Schemas. <p>Develop web pages using the HTML and CSS features with different layouts as per need of applications and Students are able to develop a dynamic webpage by the use of java script and DHTML.</p>

B.Voc(Web Technologies & Software Development)	II	ANGULAR-JS	R20WSAJS201 A	2022-23	<ol style="list-style-type: none"> 1. To create web applications. 2. To Angular JS to facilitate development of single-page web applications that use the Model-View-Controller (MVC) design pattern. 3. Reduce the amount of code you write to build rich user interface applications. 4. Retrieve data from back-end server, manipulate it and display it with ease. 5. Modularise your code with the custom services and directives.
B.VOC [WEB TECHNOLOGY]	II	'C' Programming	R20WSCP201 A	2022-23	<ol style="list-style-type: none"> 1. To learn about data types and operators. 2. To learn about decision making statements and functions. 3. To learn how to work with arrays and strings. 4. To learn about structures. 5. To understand the concept of pointers.
B.VOC [WEB TECHNOLOGY]	II	Data Communications	R20WSDC201 A	2022-23	<ol style="list-style-type: none"> 1. Introduce students to the evolution of computer networks and the concepts data communication 2. introduce students the general principles of network design and compare the different network topologies; 3. introduce students to the digital and analogue representations and channels; • describe the mechanism and techniques of encoding; 4. introduce students to the general principles of circuit and packet

					switching; 5. introduce students to the wireless Local Area Networks;
BVoc(IT & ITeS)	III	PYTHON PROGRAMING	ITPP301	2020-21	<ol style="list-style-type: none"> 1. To understand the Basics of python language and Python IDLE. 2. To gain problem solving capability. 3. To Install and run python Interpreter. 4. To gain knowledge about different data types and operators. 5. To use and explore control structures and loop constructs in python. 6. To understand and create built in and user defined datatypes. 7. To identify the various form of input and output statements and its purposes 8. To import and create arrays using array module. 9. To insert predefined functions and operations on array. 10. To understand the basics of numpy module and importing the functions from numpy module. 11. To gain knowledge about multidimensional array and its link with numpy module. 12. To understand and use the concept declaring functions and returning results from a function. 13. To explore the use of Lambdas, List, Tuples.
BVoc(IT	III	E-	ITCSCEC3	2020-21	1. Analyze the impact of E-commerce on business models and

&ITeS) BVoc(WT & SD)		Commerce	02 / WSCSCE C302		strategy. 2. Describe the major types of E-commerce. 3. Explain the process that should be followed in building an E-commerce presence. 4. Identify the key security threats in the E-commerce environment. 5. Describe how procurement and supply chains relate to B2B E-commerce.
B.Voc(IT &ITeS)	III	HTML & ANGULAR -JS	ITCSHAJ30 3	2020- 21	1. To create web applications .AngularJS to facilitate development of single-page web applications that use the Model- View- Controller (MVC) design pattern. 2. Referencing AngularJS in a Web page 3. Building Single Page Applications using AngularJS 4. Integrating forms with AngularJS 5. Extending AngularJS with custom directives, filters and service
B.VOC [WT & SD]	III	PROGRAMING IN JAVA	WSCSCPJ30 1	2020- 21	1. To learn Object-Oriented programming concepts and techniques using the Java programming language. To learn to write, test, and debug introductory level Object-Oriented programs using Java. In addition, the student will be introduced to the following concepts, which are important workforce activities: 2. Design/Develop Program 3. Design classes

					<ol style="list-style-type: none"> 4. Design interfaces, packages 5. Design the applet programs 6. Understanding Inheritance.
B.Voc (WT&SD)	III	Advanced Angular-JS	WSCSC A JS303	2020- 2021	<ol style="list-style-type: none"> 1. Using directives and components to define UI elements, routes and screens 2. Working effectively with component lifecycle events 3. Injecting dependencies to lessen coupling and increase testability 4. Building Single Page Applications using Angular 5. Integrating forms with Angular 6. Organizing code using modules
II BVoC WT/ II IT&ITeS	IV	Advanced Java	WTSD- CSC401/ ITES-CSC401	2020-21	<ol style="list-style-type: none"> 1. To understand the meaning and basic components of servlets and JSP 2. To know the required software to run Java programs 3. Understanding the use of servers 4. Understanding the use of Databases 5. Design website
II BVoC WT	IV	R-LANGUAGE	WTSD- CSC402	2020-21	<ol style="list-style-type: none"> 1. List motivation for learning a programming language 2. Access online resources for R and import new function packages into the R workspace 3. Import, review, manipulate and summarize data-sets in R

					<ol style="list-style-type: none"> 4. Explore data-sets to create testable hypotheses and identify appropriate statistical tests 5. Perform appropriate statistical tests using R Create and edit visualizations with
II BVoC IT & II BVoC WT	IV	Software Engineering	WTSD- CSC403/ ITES-CSC403	2020-21	<ol style="list-style-type: none"> 1. The ability to analyse, design, verify, validate, implement, apply and maintain software systems. 2. The ability to work in one or more significant application domains 3. The ability to manage the development, measuring using Size & Function Oriented Metrics 4. The ability to understand the analysis model with its elements and designing with its models <p>The ability to understand the concepts of Quality and Testability</p>
II B.Voc IT&ITeS	IV	Advanced Angular-JS	ITES- CSC402	2020- 2021	<ol style="list-style-type: none"> 1. Using directives and components to define UI elements, routes and screens 2. Working effectively with component lifecycle events 3. Injecting dependencies to lessen coupling and increase testability 4. Building Single Page Applications using Angular 5. Integrating forms with Angular 6. Organizing code using modules
III	V	CONTENT	R20WT501	2021-22	<ol style="list-style-type: none"> 1. Define the purpose of using CMS for digital content

B.VOC(WT&S D)		MANAGEMENT SYSTEM			<p>development and publication management</p> <ol style="list-style-type: none"> 2. Evaluate the functional roles in a CMS 3. Evaluate the considerations to be taken into account in the acquisition of a CMS 4. Evaluate the considerations to be taken into account in content modelling 5. Evaluate the considerations to be taken into account in content aggregation 6. A content management system helps you create, manage, and publish content on the web. 7. It also helps keep content organized and accessible so it can be used and repurposed effectively. 8. There are various kinds of content management systems available—from cloud-based to a headless CMS—to meet every audience need.
III B.VOC(WT&S D)	V	PHP	R20WT502	2021-2022	<ol style="list-style-type: none"> 1. To understand the meaning and basic components of PHP 2. To know the required software to run PHP programs 3. Understanding the use of servers and predefine databases 4. Understanding the database 5. Creating web site.

III B.VOC(WT&S D)	V	DATABASE MANAGEMENT SYSTEMS	R20WT503	2021-2022	<ol style="list-style-type: none"> 1. Gain knowledge of Database and DBMS. 2. Understand the fundamental concepts of DBMS with special emphasis on relational data model. 3. Demonstrate an understanding of normalization theory and apply such knowledge to the normalization of a database 4. Model database using ER Diagrams and design database schemas based on the model. 5. Create a small database using SQL. 6. Store, Retrieve data in database.
III B.VOC(WT&S D)	V	React JS	R20WT504	2021-2022	<ol style="list-style-type: none"> 1. Components. Gain insights into components, building blocks of a React app; build and compose reusable components. 2. JSX. ... 3. State. ... 4. Network requests. ... 5. Isomorphic applications. ... 6. Master Redux. ... 7. Test-driven development. ... 8. Build efficient forms.
III B.VOC(WT&S D)	VI	DATA STRUCTURES	R20WT601	2021-2022	<ol style="list-style-type: none"> 1. Ability to analyze algorithms and algorithm correctness. 2. Ability to summarize searching and sorting techniques 3. Ability to describe stack, queue and linked list operation.

					4. Ability to have knowledge of tree and graphs concepts
III B.VOC(WT&S D)	VI	.Net Programming	R20WT602	2021-2022	<ol style="list-style-type: none"> 1. Create, compile and run object-oriented C# programs using Visual Studio 2. Write and understand C# language constructs, syntax and semantics 3. Develop reusable .NET components via interface realization and standard design patterns. 4. Develop a web based application with all validations. 5. Leverage the major namespaces and classes of the .NET Framework 6. Access databases using Language Integrated Query (LINQ)
III B.VOC(WT&S D)	VI	Django	R20WT603	2021-2022	<ol style="list-style-type: none"> 1. How to create routes (or views) with Django . 2. How to serve static content and files using Django . 3. How to connect templates with models to serve data dynamically. 4. How to create Models and how to connect them with Templates and Views. 5. How to work with databases using SQLite.
III B.VOC(WT&S D)	VI	Mobile Development Application	R20WT604	2021-2022	<ol style="list-style-type: none"> 1. Identify various concepts of mobile programming that make it unique from programming for other platforms, 2. Critique mobile applications on their design pros and cons, 3. Utilize rapid prototyping techniques to design and develop

					<p>sophisticated mobile interfaces,</p> <p>4. Program mobile applications for the Android operating system that use basic and advanced phone features, and</p> <p>5. Deploy applications to the Android marketplace for distribution.</p>
I BCom(comp)	I	INFORMATION TECHNOLOGY	R20COMC103 A	2022-23	<ol style="list-style-type: none"> 1. Recognize when to use each of the Microsoft Office programs to create professional documents 2. Recognize when to use each of the Microsoft Office programs to create academic documents 3. Use Microsoft Office programs to create personal, academic and business documents following current professional and/or industry standards. 4. Apply skills and concepts for basic use of computer hardware, software, networks, and the Internet in the workplace 5. in future coursework as identified by the internationally accepted Internet and Computing Core (IC3) standards.
I BCOM COMP	II	E- COMMERCE&WE B DESIGNING	R20COMC203 A	2022-23	<ol style="list-style-type: none"> 1. Insert a graphic, table, form, links within a web page. 2. Use cascading style sheets. 3. Create and validate a web page and Ability to build a website. 4. Use operators, variables, arrays, control structures, functions and objects in JavaScript. 5. Use regular expressions for form validation.

II B.Com (Computers):	III	Programming with C & C++	R20BCOMP30 1	2021-2022	<ol style="list-style-type: none"> 1. Develop programming skills 2. Declaration of variables and constants use of operators and expressions 3. learn the syntax and semantics of programming language 4. Be familiar with programming environment of C and C++ 5. Ability to work with textual information (characters and strings) & arrays 6. Understanding a functional hierarchical code organization 7. Understanding a concept of object thinking within the framework of functional model 8. Write program on a computer, edit, compile, debug, correct, recompile and run it 9. Choose the right data representation formats based on the requirements of the problem 10. Analyze how C++ improves C with object-oriented features 11. Evaluate comparisons and limitations of the various programming constructs and choose correct one for the task in hand. 12. Exploring C programming and Design C++ classes for code reuse (Practical skills***)
II B.COM(COM)	IV	Data Base Management	R20BCOMP40 1	2021-2022	<ol style="list-style-type: none"> 1. Understand the role of a database management system in an organization.

PUTERS)		System			<ol style="list-style-type: none"> 2. Understand basic database concepts, including the structure and operation of the relational data model. 3. Understand and successfully apply logical database design principles, including E-R diagrams and database normalization 4. Understand Functional Dependency and Functional Decomposition 5. <i>Explains (Understanding*)</i> 6. To design and build a simple database system and demonstrate competence with the fundamental tasks involved with modeling, designing, and implementing a DBMS. 7. Perform PL/SQL programming using concept of Cursor Management, Error Handling, Packages 8. <i>Critically examines, using data and figures (Analysis and Evaluation**)</i> 9. Apply various Normalization techniques 10. Model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model
II B.Com(comput	IV	Object Oriented Programming with	R20BCOMP40 2	2021-2022	<ol style="list-style-type: none"> 1. Understanding the meaning and necessity of audit in modern era 2. Comprehend the role of auditor in avoiding the corporate frauds

ers)		Java			<ol style="list-style-type: none"> 3. Identify the steps involved in performing audit process 4. Determine the appropriate audit report for a given audit situation 5. Apply auditing practices to different types of business entities 6. Plan an audit by considering concepts of evidence, risk and materiality
III B.Com(Computers)	V	MOBILE APPLICATION DEVELOPMENT	R20BBCOMP5 01	2022-23	<ol style="list-style-type: none"> 1. Identify basic terms, tools and software related to android systems 2. Describe components of IDE, understand features of android development tools 3. Describe the layouts and controls 4. Explain the significance of displays using the given view 5. Explain the features of services and able to publish android Application 6. Developing interesting Android applications using MIT App Inventor.
III BCOM(COMPUTERS)	V	CYBER SECURITY AND MALWARE ANALYSIS	R20BBCO MP502	2022-2023	<ol style="list-style-type: none"> 1. Understand the computer networks, networking tools and cyber security 2. Learn about NIST Cyber Security Framework 3. Understand the OWASP Vulnerabilities 4. Implement various Malware analysis tools 5. Understand about Information Technology act 2000
I.BCOM(GEN. LOG),	I	COMPUTER APPLICATIONS	R20LSC 101CS	2020-2021	<ol style="list-style-type: none"> 1. Demonstrate basic understanding of computer hardware and software.

BBA, B.Sc (MPC,CBZ)					<ol style="list-style-type: none"> 2. Apply skills and concepts for basic use of a computer. 3. Identify appropriate tool of MS office to prepare basic documents, charts, spreadsheets and presentations. 4. Create personal, academic and business documents using MS office. 5. Create spreadsheets, charts and presentations. And Analyze data using charts and spread sheets.
I.BCOM(GE N,TP,LOG), BBA, B.Sc(MPC,C BZ)	II	INFORMATION& COMMUNICATIO N TECHNOLOGY	R20LSC201C S	2020- 2021	<ol style="list-style-type: none"> 1. Understand the literature of social networks and their properties and Explain which network is suitable for whom. 2. Develop skills to use various social networking sites like twitter, flickr, etc. 3. Learn few GOI digital initiatives in higher education. 4. Apply skills to use online forums, docs, spreadsheets, etc for communication, collaboration and research. 5. Get acquainted with internet threats and security mechanisms.

B.Com Gen,TP,LOG,COMP, BBA,BCA B.Sc MPCS,CBZ,MECS,MCCS, MSCS,DS	3	GENERAL HINDI-3	R20HIN301	2021- 2022	<ul style="list-style-type: none"> ✓ Students understood different stages and relevance of Hindi Literature. ✓ Describing the progressive nature of Sant Kabir and his Writing. ✓ Evaluate Hindi Literature from past to present. ✓ Gaining socio culture consciousness. ✓ Understanding the importance of translation.

DEPARTMENT OF ENGLISH

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Com Gen, TP, LOG, COMP, BBA,BCA B.Sc. MPCS,CBZ,MECS,MCCS, MSCS,DS	I	A Course in Communication and soft skills	R20ENG 101A	2022- 2023	<ul style="list-style-type: none"> ⊕ Exhibit various aspects of communication by way of active listening. ⊕ Learn to communicate and give presentation at a gathering. ⊕ Understand and practice different techniques of communication. ⊕ Develop good leadership skills and increase productivity, thereby creating a positive environment. ⊕ Develop all-round personalities to function

					effectively in different circumstances and can take part in various selection procedures adopted by the recruiters.
B.Com Gen, TP, LOG, COMP, BBA,BCA B.Sc. MPCS,CBZ,MECS,MCCS, MSCS,DS	II	A Course in Reading and Writing skills	R20ENG 201A	2022- 2023	<ul style="list-style-type: none"> ⊕ Develop academic vocabulary, reading and writing skills through a variety of reading and writing assignments. ⊕ Demonstrate improved oral language fluency and listening comprehension skills ⊕ Students can become as critical thinkers, readers and writers ⊕ Reading and writing skills by improving the ability to construct and structure sentences. ⊕ Synthesize information from a minimum of two sources and present both verbally and in writing.
B.Com Gen, TP, LOG, COMP, BBA,BCA B.Sc. MPCS,CBZ,MECS,MCCS, MSCS,DS	III	A Course in Conversation skills	R20ENG 301	2022- 2023	<ul style="list-style-type: none"> ⊕ Students become confident of speaking in English impeccably and with utmost enthusiasm. ⊕ Develop knowledge, skills, and judgment around human communication that facilitate their ability to work collaboratively with others. ⊕ Students can become extroverts with improved confidence. ⊕ Understand and practice Interview Etiquettes. ⊕ Become more self-confident and develop strong determination.

DEPARTMENT OF MATHEMATICS & STATISTICS

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Sc.(MPC, MPCS,MECS, MCCS,MSCS)	I	DIFFERENTIAL EQUATIONS	R20MAT101A	2022-23	<ul style="list-style-type: none"> • Gain knowledge on the concept of first order & first degree differential equations • Gain knowledge about the concept of Orthogonal Trajectories. • Gain knowledge on the concept of higher order differential equations. • Evaluate higher order linear Differential equations. • Evaluate basic application problems described by second order linear differential equations with constant coefficients.
B.Sc(DS)	I	MATHS FOR DATA SCIENCE	R20DSMAT101A	2022-23	<ul style="list-style-type: none"> • Gain knowledge on the concept of Determinants, Inverse & Rank of matrices • Apply Cayley-Hamilton Theorem on problems of linear equations. • To implement the concept of eigen values and vectors. • Learn how to solve Homogeneous and Non-Homogeneous equations Linear programming problems • Learn the concepts of limits ,continuity and their Applications • Understand Mean value theorems & their Applications.

BCA	I	NUMERICAL AND STATISTICAL METHODS	R20CMAT101A	2022-23	<ul style="list-style-type: none"> • Apply an appropriate numerical method to solve algebraic or transcendental equations • Learn how to solve system of linear equations, eigen values & eigen vectors of a square matrix. • Gain knowledge on the concept of Interpolation. • Apply various statistical techniques such as Measures of Central Tendency and Dispersion. & Understanding of relationship between variables using the method of Correlation and Fit Analysis. • Understand the concept of Probability & their Applications
B.Voc(WT/SD)	I	DISCRETE MATHEMATICS – I	R20WSMAT101A & R20ITMAT101A	2022-23	<ul style="list-style-type: none"> • Gain knowledge related to the concept of Algebra. • Find solutions in Special products, factors, HCF & LCM of algebraic expressions. • Understand about fractions, exponential and logarithmic Fundamental operations. • Understand Radical form, similar radicals, addition, multiplication & division of radical conjugates. • Learn to solve Simple operations with complex nos.
B.Sc.(MPC, MPCS,MECS,	II	SOLID GEOMETRY	R20MAT201A	2022-23	<ul style="list-style-type: none"> • Understand the concept of three dimensional geometry

MCCS, MSCS)					<ul style="list-style-type: none"> • Measure the volumes of various solid shapes • Find numerical solutions in the fields of construction, defence .etc. • Define Skew lines and calculate the shortest distance between skew lines. • Inculcate knowledge in solving problems on Analytical Geometry.
B.VOC(IT)& B.VOC(WT)	II	DISCRETE MATHEMATICS-II	R20WSMAT201A	2022- 23	<ul style="list-style-type: none"> • Understand the concept of Algebra • Finding solutions in Special products, exponents, Fundamental operations. • Understand applications in classical mechanics. • Determine properties of relations • Identity functions and their properties.
B.Sc.(MPC, MPCS,MECS, MCCS,MSCS)	III	ABSTRACT ALGEBRA	R20MAT301	2021- 22	<ul style="list-style-type: none"> • Understand the concept of abstract algebra • Express complex problems in algebraic form and to solve them. • Understand the concept of Groups. • Define algebraic structures. • Understand the concept of binary operations by definitions and examples.
B.VOC (IT) & BVOC(WT)	III	ALGEBRAIC SOLUTIONS AND NUMERICAL ANALYSIS	WSMAT301/ ITMAT301	2021- 22	<ul style="list-style-type: none"> • Acquire the basic knowledge and structure of Progressions. • Understand the significance of the notation of a Interpolation. • Understand the behavior of permutations and operations on them.

					<ul style="list-style-type: none"> • Understand the forward, backward & central differences with applications. • Understand Numerical Solution Techniques
ALL II YEAR GROUPS	III	ANALYTICAL SKILLS	R20LSC301	2021-22	<ul style="list-style-type: none"> • Understand the basic concepts of arithmetic ability, quantitative ability, logical reasoning, business computations and data interpretation and obtain the associated skills. • Acquire competency in the use of verbal reasoning. • Apply the skills and competencies acquired in the related areas • Solve problems pertaining to quantitative ability, logical reasoning and verbal ability inside and outside the campus. • Apply Skill development in quantitative techniques.
B.Sc (MPC,MPCs,MECs, MCCs,MSCs)	IV	REAL ANALYSIS	R20MAT401	2021-22	<ul style="list-style-type: none"> • Get a clear idea about the real numbers and real valued functions. • Obtain the skills of analyzing the concepts and applying appropriate methods for testing convergence of a sequence/ series • Test the continuity and differentiability and Riemann integration of a function. • Know the Geometrical interpretation of mean value theorems.

					<ul style="list-style-type: none"> • Understand the theory of Sequences and Series.
B.Sc (MPC,MPCs,MECs, MCCs,MSCs)	IV	LINEAR ALGEBRA	R20MAT402	2021- 22	<ul style="list-style-type: none"> • Understand the concepts of vector spaces, subspaces, bases, dimension and their properties. • Understand the concept of Linear Transformation and their properties. • Apply Cayley-Hamilton Theorem for finding Inverse of Matrix and high powers of matrices without using routine methods. • Learn the properties of inner product spaces and determine orthogonality in inner product spaces. • Understand Orthogonalisation Process.
B.Sc IOT	IV	ADVANCED NUMERICAL ANALYSIS	R20IOTMAT401	2021- 22	<ul style="list-style-type: none"> • Find solutions for algebraic equations, ordinary differential equations • Calculate the errors and approximations in numerical methods. • Analyse finite differences. • Apply Knowledge in Statistics through Curve Fitting. • Gain knowledge on Numerical Differentiation and Integration Concepts.
					<ul style="list-style-type: none"> • Develop Skill to choose and apply appropriate numerical methods to obtain appropriate solutions to different mathematical problems.

B.VOC(IT &ITS) & B.VOC(WT)	IV	NUMERICAL AND STATISTICAL METHODS	ITMAT401 & WSMAT401	2021- 22	<ul style="list-style-type: none"> • Apply various statistical technique such as measures of central tendency and dispersion • Understand the relation between variables using the method of correlation and fit analysis. • Develop Skills to execute programs of various numerical methods and statistical techniques for solving mathematical problems. • Understand and implement various concepts of Statistics in real life.
B.Sc	V/VI	SPECIAL FUNCTIONS	R20MATA502/R20MATA602	2022- 23	<ul style="list-style-type: none"> • Understand the Beta and Gamma functions, their properties and relation between these two functions, understand the orthogonal properties of Chebyshev polynomials and recurrence relations. • Find power series solutions of ordinary differential equations. • Solve Hermite equation and write the Hermite Polynomial of order (degree) n, also find the generating function for Hermite Polynomials, study the orthogonal properties of Hermite Polynomials and recurrence relations. • Solve Legendre equation and write the Legendre equation of first kind, also find the generating function for

(MPC,MPCs,MCCs ,MECs,MSCs)					<p>Legendre Polynomials, understand the orthogonal properties of Legendre Polynomials.</p> <ul style="list-style-type: none"> • Solve Bessel equation and write the Bessel equation of first kind of order n, also find the generating function for Bessel function understand the orthogonal properties of Bessel function.

STATISTICS

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
MSCs, DS	I	Descriptive Statistics	R20STAT101A R20DSSTAT101A	2021- 2022	<ul style="list-style-type: none"> ➤ Tabulate and represent the data in Diagrams and Graphs. ➤ Apply the formula and calculate descriptive measures of statistics. ➤ Calculate and interpret the correlation between two

					<p>variables and analyse the data and predict the future value using curve fitting.</p> <ul style="list-style-type: none"> ➤ Calculate the simple linear regression equation for a set of data and significance of the correlation coefficient. ➤ Examine the association between the attributes.
MSCs, DS	II	Probability Theory and Distributions	R20STAT201A R20DSSTAT201A	2021-2022	<ul style="list-style-type: none"> ➤ Compute probabilities using classical, statistical and axiomatic approach. Translate real-world problems into probability models. ➤ Examine the given variable is either discrete or continuous and also to calculate joint, marginal and conditional distributions in bi-variate random variables. ➤ Solve the problems in mathematical expectations and also apply the concept of chebychev's inequality. ➤ Derive the characteristics of discrete univariate distributions. ➤ Derive the characteristics of continuous univariate distributions.
MSCs, DS	III	Statistical Inference	R20STAT301	2020-2021	<ul style="list-style-type: none"> ➤ Construct the point and interval estimators. Evaluate the properties of estimators. Demonstrate understanding of the theory of maximum likelihood estimation. ➤ Understand testing of statistical hypothesis, Neymann Pearson Lemma. ➤ Distinguish various large sample tests used in sampling theory. ➤ Distinguish various small sample tests used in

					<p>sampling theory.</p> <ul style="list-style-type: none"> ➤ Understand the concept of non- parametric tests.
MSCs, DS	IV	Sampling Techniques and Design of Experiments	R20STAT401 R20DSSAT401	2020-2021	<ul style="list-style-type: none"> ➤ Gain knowledge about simple random sampling with and without replacement and estimation of variances. ➤ Analyse various sampling techniques and make interpretations for further studies. ➤ Able to analyse one-way and two-way classification without interactions ➤ Can design CRD, RBD and LSD Layouts and their Statistical analysis- and can estimate the efficiencies of LSD over RBD and CRD ➤ Can do the statistical analysis of 2^2, 2^3 and 3^2 Factorial Experiment designs.
MSCs, DS	IV	Applied Statistics	R20STAT402 R20DSSTAT402	2000-2021	<ul style="list-style-type: none"> ➤ Identify the components of time series and the method of measuring trend. ➤ Apply the different measures of variations to forecast the data. ➤ Construct, evaluate and interpret the index numbers. ➤ Can estimate measures of vital events basic aspects, viz. the fertility, mortality and migration. ➤ Construction and implication of life tables.
MSCs, DS	V	Operations Research - I	R20STATA501/601 R20DSSTATA501/601	2021-2022	<ul style="list-style-type: none"> ➤ Able to formulate a given simplified description of a suitable real-world problem as a linear programming model in general, standard and canonical forms ➤ Can draw a graphical representation of a two-dimensional linear programming model given in general, standard or canonical forms.

					<ul style="list-style-type: none"> ➤ Use the simplex method to solve small linear programming models by hand, given a basic feasible point. ➤ Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained. ➤ Solve Post optimal linear programming problems.
MSCs, DS	VI	Operations Research - II	R20STAT502/602 R20DSSTAT502/602	2021-2022	<ul style="list-style-type: none"> ➤ Interpret minimum cost of transporting item from Source and estimation. ➤ Analyze the optimum schedule and assignment schedule. ➤ Evaluate Total Elapsed time, Idle time for processing of jobs. ➤ Get Knowledge about network construction and to find critical path and total project duration. ➤ The intention of game theory is to produce optimal decision-making of independent and competing actors in a strategic setting.
IOT	III	R20IOTSTAT301	Descriptive Statistics	2021-2022	<ul style="list-style-type: none"> ➤ Apply the formula and calculate descriptive measures of statistics. ➤ Calculate and interpret the correlation between two variables. Analyse the data and predict the future value using curve fitting. ➤ Calculate the simple linear regression equation for a set of data and significance of the correlation coefficient. ➤ Derive the characteristics of discrete univariate distributions. ➤ Derive the characteristics of continuous univariate

					distributions.
IOT	IV	R20IOTSTAT401	Statistical Inference	2021-2022	<ul style="list-style-type: none"> • Construct the point and interval estimators, evaluate the properties of estimators and demonstrate the theory of maximum likelihood estimation. ➤ Understand testing of statistical hypothesis, Neymann Pearson Lemma. ➤ Distinguish various large sample tests used in sampling theory. ➤ Distinguish various small sample tests used in sampling theory. ➤ Analyze various sampling techniques and make interpretations for further studies.

DEPARTMENT OF CHEMISTRY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.Sc (MPC, CBZ and MCCS)	I	Inorganic and Physical Chemistry	R20CHE101A	2022-23	<ul style="list-style-type: none"> ➤ Understand the structure and preparation of boron, silicon, nitrogen, phosphorous, sulphur and halogen compounds. ➤ The students could able to know the electronic configuration of d-block elements and its effect on colour and magnetic properties. Catalytic properties of d-block elements its industrial applications. → The students could able to know the conductors and semiconductors. ➤ The students could able to know the conductors and semiconductors.

					<ul style="list-style-type: none"> ➤ Recognises the difference between d- block elements and f-block elements, Lanthanide contraction and its consequences, Colour properties, Lanthanides separation. ➤ Students will be in a position to apply the concepts of the topic in various scientific situations, say, conductivity of crystals due to crystal defects etc. ➤ Ability to differentiate between real and ideal gases. Also, they will be in a position to explain why only real gases show Joule- Thomson effect and why only real gases can be liquefied. Learning 'Liquid state' makes them aware of classification of liquid crystals and will be in a position to explain the functioning of LCD. ➤ Make the students aware of all the fundamental concepts of Solutions, and its applications such as isotonic solutions, azeotropic mixtures etc.
I B.Sc (MPC, CBZ and MCCS)	II	Organic and General Chemistry	R20Che201A	2022-23	<ul style="list-style-type: none"> ➤ Students are expected to know the differences between alkaes, methods of synthesis, chemical properties, various types of strains involved in the cyclic hydrocarbons and their effect on their geometry and chemical properties, theories of strain such as Bayer's theory. ➤ The student will demonstrate the chemical behavior of alkenes and alkynes by identifying properties of alkenes and alkynes, drawing the mechanism for alkene addition reactions, using Markovnikov's rule to predict the region

					<p>specificity of several alkene addition reactions and Identifying and illustrating reactions of alkynes</p> <ul style="list-style-type: none"> ➤ Students are to be in a position to apply the concept of resonance in explaining different phenomena such as acidity, basicity of acids, phenols and amines. Also, they are expected to be in a position to explain the preference of electrophilic and nucleophilic substitutions for ortho, para or meta positions. ➤ Students will have clear idea of all the concepts and will be in a position to apply the concepts in explaining water purification methods, colloidal medicines etc. ➤ Student can explain most of the chemical phenomena in daily life. ➤ This will make the students to understand how the three dimensional structure of molecules effect their chemical and physical properties. Also, they are in a position to explain the importance of stereochemistry in medicine.
II B.Sc (MPC, CBZ and MCCS)	III	Organic Chemistry and Spectroscopy	R20CHE301	2021-22	<ul style="list-style-type: none"> ➤ Acquires knowledge on halogen derivatives of organic compounds, Types of organic reactions, Importance of stereochemistry in the organic reactions especially in substitution reactions. ➤ Able to differentiate alcohols and phenols, able to write preparative methods for alcohols and phenols.

					<ul style="list-style-type: none"> ➤ Distinguishes between different carbonyl compounds, able to write preparation methods of carbonyl compounds, Synthetic importance of base catalysed reactions. ➤ Able to describe the importance of carbanion in the organic synthesis, write the synthetic applications of malonic ester and acetoacetic ester. ➤ Names the carboxylic acids according to IUPAC, describes the acidity, write the methods of preparation and reactivity. ➤ Students will able to apply Beer- Lambert law for quantitative determinations. Able to know the modes of vibrations in organic molecules. → Able to identify type of functional group present in the organic molecules. → Able to learn the magnetic behaviour of ^1H and elucidation of structures of organic compounds by using ^1H-NMR data. ➤ Able to identify the type of conjugation in organic molecules and effect of conjugation on colour of the compounds.
II B.Sc (MPC, CBZ and MCCS)	IV	Inorganic, Organic and Physical Chemistry	R20CHE401	2021-22	<ul style="list-style-type: none"> ➤ Students should be able to realize the potential applications of Organometallic compounds in the synthesis of various chemicals and polymers of day today use both in micro scale macro scale. ➤ Describe and recognize the basic and ring structures of glucose and fructose and their

					<p>conversions.</p> <ul style="list-style-type: none"> ➤ Predict the different type of amino acids and recognize the basic properties of amino acids. ➤ The student will learn nomenclature, structure, properties, syntheses, and reactions of the simple 5 and 6-membered ring heterocyclics. ➤ Able to understand the nomenclature of nitro hydrocarbons, tautomerism in nitro hydrocarbons. ➤ Students understand the nomenclature of amines, Basicity of amines, comparison of basicity, separation of amines. Chemical properties of amines. ➤ Understand difference between thermal and photochemical reactions, laws of photochemistry, quantum yield and types of photochemical reactions. ➤ Able to learn the different types of thermodynamic systems, reaction energies, feasibility of the chemical reactions, entropy and its significance.
II B.Sc (MPC, CBZ and MCCS)	IV	Inorganic and Physical Chemistry	R20CHE402	2021-22	<ul style="list-style-type: none"> ➤ Students able to learn the bonding in the coordinate compounds, stability, colour and magnetic properties, Learn the CFSE calculations, Isomerism in complex compounds. ➤ Able to know the stability and reactivity of the complexes, labile and inert complexes, methods for determination of composition of the complexes and calculation of magnetic

					<p>moment.</p> <ul style="list-style-type: none"> ➤ Students could able to learn the applications of phase rule in metallurgy, desilverisation of lead. ➤ Student could able differentiate strong electrolytes and weak electrolytes, determine the transport numbers able to calculate the EMF of the given cell. ➤ Apply experimental techniques to the determination of rate laws and rate constants.
III B.Sc (MPC, CBZ and MCCS)	V/VI	Synthetic Organic Chemistry	R20CHEA501/ R20CHEA601	2022-23	<ul style="list-style-type: none"> ➤ Able to analyse the mode of activation of a pericyclic reaction. ➤ Understand the concept of organic photochemistry with different processes and terminologies and know about the photochemical reactions of carbonyl compounds. ➤ Know about the synthesis of some simple molecules using disconnection approach. ➤ Understand the formation of C-C bonds through coupling reactions. ➤ Able to understand the different types of reagents used for oxidation and reduction reactions.
III B.Sc (MPC, CBZ and MCCS)	V/VI	Synthetic Organic Chemistry	R20CHEA502/ R20CHEA602	2022-23	<ul style="list-style-type: none"> ➤ Do fragmentation pattern (analysis) of organic molecules by using mass spectrometry. ➤ Analysis of organic molecules by IR, NMR and Mass spectroscopic techniques. ➤ Student could able to acquire some basic knowledge of Chromatographic techniques like

					<p>TLC, Paper, Column and HPLC.</p> <ul style="list-style-type: none"> ➤ Can apply these techniques for the separation of mixture of organic or inorganic compounds. ➤ Develops the extraction techniques for organic molecules from plant materials
--	--	--	--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

DEPARTMENT OF PHYSICS & ELECTRONICS

PHYSICS:

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Sc. MPCS	I	Mechanics, Waves & Oscillations	R20PHY101A	2022-2023	<ul style="list-style-type: none"> ✓ Understand Newton's laws of motion and motion of variable mass system and its application to rocket motion and the concepts of impact parameter, scattering cross section. ✓ Apply the rotational kinematic relations, the principle and working of gyroscope and its applications and the precessional motion of a freely rotating symmetric top. ✓ Comprehend the general characteristics of central forces and the application of Kepler's laws to describe the motion of planets and satellite in circular orbit through the study of law of Gravitation. ✓ Understand postulates of Special theory of relativity and its consequences such as length contraction, time dilation, relativistic mass and mass-energy equivalence. ✓ Figure out the formation of harmonics and overtones in a stretched string and acquire the knowledge on Ultrasonic waves, their

					production and detection and their applications in different fields.
B.Sc. MPCS	II	Wave Optics	R20PHY201A	2022-2023	<ul style="list-style-type: none"> ✓ Understand the phenomenon of interference of light and its formation in (i) Lloyd's single mirror due to division of wave front and (ii) Thin films, Newton's rings and Michelson interferometer due to division of amplitude. ✓ Distinguish between Fresnel's diffraction and Fraunhofer diffraction and observe the diffraction patterns in the case of single slit and the diffraction grating. ✓ Understand the various methods of production of plane, circularly and polarized light and their detection and the concept of optical activity. ✓ Comprehend the basic principle of laser, the working of He-Ne laser and Ruby lasers and their applications in different fields. ✓ Understand the basic principles of fibre optic communication and explore the field of Holography and Nonlinear optics and their applications.
B.Sc. MPC & MPCS	III	HEAT & THERMODYNAMICS	R20PHY301	2021-22	<ul style="list-style-type: none"> ✓ Understand the basic aspects of kinetic theory of gases, Maxwell-Boltzmann distribution law, equipartition of energies, mean free path of molecular collisions and the transport phenomenon in ideal gases. 2. Gain knowledge on the basic concepts of thermodynamics, the first and the second law ✓ of thermodynamics, the basic principles of

					<p>refrigeration, the concept of entropy ,the Thermodynamic potentials and their physical interpretations.</p> <ul style="list-style-type: none"> ✓ Understand the working of Carnot's ideal heat engine, Carnot cycle and its efficiency. ✓ Develop critical understanding of concept of Thermodynamic potentials, the formulation of Maxwell's equations and its applications. ✓ Examine the nature of black body radiations and the basic theories.
B.Sc. MPC & MPCS	IV	Electricity, Electromagnetism & Electronics	R20PHY401	2021-22	<ul style="list-style-type: none"> ✓ Understand the Gauss law and its application to obtain electric field in different cases and formulate the relationship between electric displacement vector, electric polarization, Susceptibility, Permittivity and Dielectric constant. ✓ Apply the knowledge of Gauss's law to derive relations connecting dielectric Parameters and their applications. ✓ Understand Biot and Savart's law and Ampere's circuital law to describe and explain the generation of magnetic fields by electrical currents. ✓ Develop an understanding on the unification of electric and magnetic fields and Maxwell's equations governing electromagnetic waves. ✓ Understand the operation of basic logic gates and universal gates and their truth tables.
B.Sc. MPC & MPCS	IV	MODERN PHYSICS	R20PHY402	2021-22	<ul style="list-style-type: none"> ✓ Develop an understanding on the concepts of

					<p>Atomic and Modern Physics, basic elementary quantum mechanics and nuclear physics.</p> <ul style="list-style-type: none"> ✓ Develop critical understanding of concept of Matter waves and Uncertainty principle. ✓ Get familiarized with the principles of quantum mechanics and the formulation of Schrodinger wave equation and its applications. ✓ Examine the basic properties of nuclei, characteristics of Nuclear forces, salient features of nuclear models and different nuclear radiation detectors. ✓ Get familiarized with the Nano materials, their unique properties and applications.
B.Sc. MPC & MPCS	V & VI	APPLICATIONS OF ELECTRICITY & ELECTRONICS	R20PHYC501/ R20PHYC601	2022-23	<ul style="list-style-type: none"> ✓ Identify various components present in Electricity & Electronics Laboratory. ✓ Acquire a critical knowledge of each component and its utility (like resistors, capacitors, inductors, power sources etc.). ✓ Demonstrate skills of constructing simple electronic circuits consisting of basic circuit elements. ✓ Understand the need & Functionality of various DC & AC Power sources. ✓ Comprehend the design, applications and practices of various electrical & Electronic devices and also their trouble shooting.
B.Sc. MPC & MPCS	V & VI	ELECTRONIC INSTRUMENTATION	R20PHYC502 / R20PHYC602	2022-23	<ul style="list-style-type: none"> ✓ Identify various facilities required to set up a basic Instrumentation Laboratory. ✓ Acquire a critical knowledge of various Electrical

					<p>Instruments used in the Laboratory.</p> <ul style="list-style-type: none"> ✓ Demonstrate skills of using instruments like CRO, Function Generator, Multimeter etc. through hands on experience. ✓ Understand the Principle and operation of different display devices used in the display systems and different transducers. ✓ Comprehend the applications of various biomedical instruments in daily life like B.P. meter, ECG, Pulse oxymeter etc. and know the handling procedures with safety and security.

ELECTRONICS & IoT:

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I B.SC MECS	I	CIRCUIT THEORY AND ELECTRONIC DEVICES	R20ELE101A	2022-23	<p>At the end of the course, the student will be able to</p> <p>CO1: Remember the concept of current & voltage in circuits.</p> <p>CO2: Understand various Electrical networks by using principles of network theorems.</p> <p>CO3: Understand the behaviour of R, C network with DC & sinusoidal excitation.</p> <p>CO4: Understand the behaviour of Inductor and its various states.</p> <p>CO5: Apply the concept of Resonance & R, L, C network with variation of any one of it.</p>
		DIGITAL			<p>CO1: Understand the binary number theory of digital circuits.</p> <p>CO2: Remember the concepts of Boolean algebra and have knowledge to analyse and design</p>

I B.SC MECS	II	ELECTRONICS	R20ELE201A	2022-23	Combinational systems using standard gates and minimization methods (such as karnaugh maps). CO3: Remember various logical inputs of different IC- logic families. CO4: Apply and design flip-flops and latches for sequential systems composed of standard Sequential modules, such as counters and registers. CO5: Analyse design combinational systems composed of standard combinational modules, such as multiplexers and decoders and understand various data manipulation circuits.
II B.SC MECS	III	ANALOG CIRCUITS AND COMMUNICATION	R20ELE301	2021-22	CO1: Analyse important types of integrated circuits. CO2: Demonstrate the ability to design practical circuits that perform the desired operation. CO3: Use of different modulation and demodulation techniques used in analog communication. CO4: Identify and solve basic communication problems. CO5: Analyse transmitters and receiver circuits.
II B.SC MECS	IV	MICROPROCESSOR SYSTEMS	R20ELE401	2021-22	CO1: Gain good knowledge on microprocessor and implement in practical applications CO2: Design system using memory chips and peripheral chips for 16 bit 8086 microprocessor. CO3: Understand and devise techniques for faster execution of instructions, CO4: Learn to understand speed of operations and performance of microprocessors.

					CO5: Understand multi core processor and its advantages.
II B.SC MECS	IV	MICRO CONTROLLER AND INTERFACING	R20ELE402	2021-22	CO1: Acquire knowledge about microcontrollers embedded processors and their applications. CO2: Understand the internal architecture and interfacing of different peripheral devices With Microcontrollers. CO3: Write the programs for microcontroller. CO4: Understand the role of embedded systems in industry. CO5: Understand the design concept of embedded systems.
III BSC MECS	VI	INDUSTRIAL ELECTRONICS	R20ELEA601	2022-23	Students after successful completion of the course will be able to: CO1: Identify various facilities required to set up a basic Instrumentation Laboratory. CO2: Acquire a critical knowledge of various Electrical Instruments used in the Laboratory. CO3: Demonstrate skills in using instruments like Rectifiers, Multimeters, Power supplies, Voltage Regulators etc. through hands-on experience. CO4: Understand the Principle and operation of different Electronic Heating devices. CO5: Design and analyse circuits containing digital components and microprocessors.
III BSC MECS	VI	ELECTRONIC INSTRUMENTATION	R20ELEA602	2022-23	Students after successful completion of the course will be able to: CO1: Identify various facilities required to set up a

					<p>basic Instrumentation Laboratory.</p> <p>CO2: Acquire a critical knowledge of various Electrical Instruments used in the Laboratory.</p> <p>CO3: Demonstrate skills of using instruments like CRO, Function Generator, and Multimeter etc. through hands on experience.</p> <p>CO4: Understand the Principle and operation of different display devices used in the display systems and different transducers</p> <p>CO5: Comprehend the applications of various biomedical instruments in daily life like B.P.meter, ECG, Pulse oximeter etc. and know the handling procedures with safety and Security.</p>
I B.SC IOT	I	BASIC ELECTRICTY AND DEVICES	R20IOTELE101A	2022- 23	<p>CO1: Analyses basic DC and AC electric circuits.</p> <p>CO2: Verify KCL, KVL, and maximum power transfer theorem (MPTT) and analyze the effects of open and short circuits in DC circuits.</p> <p>CO3: To apply the concept of Resonance & R, L, C network with variation of any one of it.</p> <p>CO4: To understand the operation and V-I characteristics of FET MOSFET, SCR & biasing of FET.</p> <p>CO5: Ability to understand operation and design aspects of rectifiers and regulators.</p>
I B.SC	II	ANALOG ELECTRONICS &	R20IOTELE201A	2022-	<p>CO1: Design & Develop signal conditioning/sensing circuits for sensor interfaces</p> <p>CO2: Test different data loggers for their features</p> <p>CO3: Understand the basic building blocks of linear</p>

IOT		DATA ACQUISITION		23	integrated circuits and its characteristics. CO4: Analyse the linear- non-linear and specialized applications of operational amplifiers. CO5: Understand the theory of ADC and DAC.
II B.SC IOT	III	DIGITAL ELECTRONICS	R20IOTELE301	2021-22	CO1: Create the appropriate truth table from a description of a combinational logic Function. CO2: Create a gate-level implementation of a combinational logic function described by a truth table using and/or/inverter gates, MUX'S or ROMs, and analyse its timing behaviour. CO3: Create a state transition diagram from a description of a sequential logic function and then convert the diagram into an implementation of a finite-state machine with the appropriate Combinational and sequential components. CO4: Evaluate combinational and sequential logic designs using various metrics: switching speed, throughput/latency, gate count and area, energy dissipation and power. CO5: Properly incorporate synchronous and asynchronous memories into a circuit Design.
II B.SC IOT	IV	INTRODUCTION TO MICROPROCESSOR AND MICROCONTROLLER	R20IOTELE401	2021-22	CO1: Apply knowledge and demonstrate programming proficiency using the various addressing modes and data transfer instructions of the target microprocessor and microcontroller. CO2: Compare accepted standards and guidelines to select appropriate Microprocessor (8085 & 8086) and Microcontroller to meet specified performance requirements.

					<p>CO3: Analyze assembly language programs; select appropriate assemble into machine a cross assembler utility of a microprocessor and microcontroller.</p> <p>CO4: Design electrical circuitry to the Microprocessor I/O ports in order to interface the processor to external devices.</p> <p>CO5: Evaluate assembly language programs and download the machine code that will provide solutions real-world control problems.</p>
II B.SC IOT	IV	INTRODUCTION TO ARM MICROCONTROLLER	R20IOTELE402	2021-22	<p>CO1: Understand the features of embedded systems, architecture of ARM7 and applications.</p> <p>CO2: Analyse and understand the instruction set and development tools of ARM.</p> <p>CO3: Analyse and understand the THUMB state and achieving competency in assembly programming of ARM.</p> <p>CO4: Understand the exception, interrupts and interrupt handling schemes.</p> <p>CO5: Understand the hardware and interfacing peripheral devices to LPC2148.</p>
III B.SC IOT	V	Embedded Systems Design With Stm-32	R20IOTELEA501	2022-23	<p>CO1: Understand the concept of embedded system, microcontroller, different components of microcontroller and their interactions.</p> <p>CO2: Get familiarized with programming environment to develop embedded solutions.</p> <p>CO3: Program ARM microcontroller to perform various tasks.</p> <p>CO4: Understand the key concepts of embedded</p>

					<p>systems such as I/O, timers, interrupts and interaction with peripheral devices.</p> <p>CO5: Understand the basic hardware components and their selection method based on the characteristics and attributes of an Embedded System.</p>
III B.SC IOT	V	INTRODUCTION TO ARDUINO PROGRAMMING	R20IOTELEA502	2022-23	<p>CO1: Familiar with Arduino environment and its applications.</p> <p>CO2: Able to understand Arduino programming with C++.</p> <p>CO3: Able to Design Smart systems applications.</p> <p>CO4: Able to understand about any new IDE, compiler, and MCU chip in Arduino compatible boards or similar types.</p> <p>CO5: Able to Understand the communication between smart phones and home appliances.</p>
III B.SC IOT	V	Robotics And Its Applications	R20IOTA501	2022-23	<p>CO1: Analyses the function of sensor in robot and design the robotic arm with various tools</p> <p>CO2: Demonstrate knowledge of industrial robots, characteristics, end effectors and actuators.</p> <p>CO3: Apply spatial transformation to obtain forward and inverse kinematics</p> <p>CO4: Describe working principle of various sensors and program different operations</p> <p>CO5: Appreciate applications of robots in industry.</p>
III B.SC IOT	V	IOT Sensors & Communication protocols	R20IOTA502	2022-23	<p>CO1: Design and develop IoT based sensor systems.</p> <p>CO2: Select IoT protocols and software.</p> <p>CO3: Evaluate the wireless technologies for IoT.</p> <p>CO4: Appreciate the need for IoT Trust and variants</p>

					of IoT. CO5: Evaluate performance characteristics of different types of sensors.

DEPARTMENT OF COMMERCE & MANAGEMENT

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
B.Com. General TP Computers Logistics	I	Fundamentals of Accounting	R20COM101A	2022- 23	<ul style="list-style-type: none"> ○ Develop the ability to use accounting concepts and principles ○ Demonstrate the ability to use a basic accounting system to create (record, classify and summarize) the business transactions. ○ To understand the entry of transactions in Double entry book keeping system and various books of accounts. ○ Apply the use of the fundamental accounting equation to analyze the effect of business transactions in an organization ○ Understand the nature and purpose of financial statement.
B.Com. General TP Computers Logistics	II	Business Organisation and Management	R20COM102A	2022- 23	<ul style="list-style-type: none"> ○ Understand the basic concepts of business organizations ○ Identify the factors involved in determining the formation of business units ○ Apply the ethics of business in the ordinary trade ○ Gain the knowledge on the applicability of the recent trends involved in various supporting

					<p>institutions and secondary market</p> <ul style="list-style-type: none"> ○ To propagate awareness on the role of supporting institutions for business
<p>B.Com. General TP Computers Logistics BBA BCA</p>	I	<p>Insurance Promotion</p>	R20SDC102B	2022-23	<ul style="list-style-type: none"> ○ Understand the field level structure and functioning of insurance sector and it's role in protecting the risks ○ Comprehend pertaining skills and their application for promoting insurance coverage ○ Plan 'promoting insurance coverage practice' as one of the career options. ○ To know about various types of insurance available. ○ Prepare better for the Insurance Agent examination conducted by IRDA.
B.Com. General	I	<p>Business Environment</p>	R20COMG103A	2022-23	<ul style="list-style-type: none"> ○ Identify and evaluate the complexities of business environment and their impact on the business. ○ Analyze the relationships between Government and business and understand the political, economic, legal and social policies of the country. ○ Analyze current economic conditions in developing emerging markets, and evaluate present and future opportunities. ○ Gain knowledge about the operation of different institutions in international business environment. ○ To have a critical study of liberalization,

					privatization and globalization.
B.Com. TP	I	Income Tax-I	R20COMT103A	2022-23	<ul style="list-style-type: none"> ○ To identify the technical terms related to Income Tax. ○ To determine the residential status of an individual and scope of total income. ○ To enable the students to compute income under various heads namely income from salaries, house property ○ To enable the students to discuss the various exemptions under section 10 the Income tax act, 1961. ○ To comprehend the basic knowledge of the laws governing to Income Tax.
B.Com. Logistics	I	Economies of Transport	R20COML103A	2022-23	<ul style="list-style-type: none"> ○ Understanding the issues & challenges in the Transportation Sector ○ To develop skills required for Transport planning & formulation ○ To learn the basic information about the integration of transportation types. ○ To understand the legal regulations related to land, air, sea and railway. ○ To know about the basic concepts of transportation and the importance of transportation
BBA	I	Principles of Management	R20BBA101A	2022-23	<ul style="list-style-type: none"> ○ Recognize opportunities and challenges associated with strategy-making ○ Identify how environments, strategy, structure, culture, tasks, people, and outputs, inform

					<p>managerial decisions</p> <ul style="list-style-type: none"> ○ Understand and analyze how managers can formulate and implement strategies effectively ○ Understand how the managerial tasks of planning, organizing, and controlling can be executed in a variety of circumstances. ○ To learn how good managers make organizations successful by building competitive advantages in the forms of cost competitiveness, quality, speed and innovation.
BBA	I	Managerial Economics	R20BBA102A	2022-23	<ul style="list-style-type: none"> ○ Apply the knowledge of the mechanics of supply and demand to explain working of markets ○ Describe how changes in demand and supply affect markets ○ Understand the choices made by a rational consumer ○ Explain relationships between production and costs ○ Define key characteristics and consequences of different forms of markets
BBA	I	Quantitative Methods for Managers	R20BBA103A	2022-23	<ul style="list-style-type: none"> ○ Engage in independent and reflective learning. Analyse problems, apply critical thinking, and draw conclusions based on business data. ○ Be familiar with relevant mathematical and statistical terminology. ○ Understand various quantitative & statistical methods

					<ul style="list-style-type: none"> ○ Understand data and draw inference from data ○ Identify ethical issues in business practice and statistical reporting.
B.Com. General TP Computers Logistics BBA BCA	II	Agriculture Marketing	R20SDC201B	2022- 23	<ul style="list-style-type: none"> ○ Understand and appreciate the structure and working of the agricultural marketing system in India. ○ Learn how the agriculture marketing system affects the farmers, consumers, and intermediaries. ○ Develop strategies through which the dynamic marketing system will respond to create a win-win situation ○ Appreciate the possible changes in the agriculture input, output, and food market ○ Impart knowledge of the marketing efficiency and agricultural prices.
B.Com. General TP Computers Logistics BBA BCA	II	Advertising	R20SDC203B	2022- 23	<ul style="list-style-type: none"> ○ To examine the economic and social aspects of advertising ○ To explain the concept of IMC ○ To evaluate brand building in advertising, special purpose advertising and trends in advertising ○ To identify aspects related to advertising agency and careers in advertising ○ To examine the fundamentals of creativity in advertising and the concept of creativity through endorsements

B.Com. General TP Computers Logistics	II	Financial Accounting	R20COM201	2022- 23	<ul style="list-style-type: none"> ○ Exemplify to prepare and analyse the consignment accounts. ○ Acquire the basic concept of accounting terms. ○ Journalize the ability to rectify the errors in bank reconciliation statement. ○ Exposed to various methods of depreciation ○ Demonstrate insight into single and double entry system of accounting.
B.Com. General TP Computers Logistics	II	Business Economics	R20COM202	2022- 23	<ul style="list-style-type: none"> ○ Paraphrase the importance of business economics and its terms. ○ Articulate the basic knowledge of the demand functions ○ Diagnose the factors of consumer behavior ○ Enumerate and identify the types of market and product pricing. ○ Identify and develop the in depth knowledge of business economics.
B.Com. General	II	Banking Theory and Practice	R20COMG203	2022- 23	<ul style="list-style-type: none"> ○ Get familiarize with the basic concepts and practice of banking and the principles ○ To understand about recent trends and innovations in the banking sector. ○ To elucidate the bank lending policies and procedures ○ To know about electronic banking ○ To understand functions of different types of bank

B.Com. TP	II	Income Tax - II	R20COMT203	2022-23	<ul style="list-style-type: none"> ○ Ascertain the provisions of capital gains. ○ Articulate the basic concept related to income from other sources. ○ Familiar with the concept of clubbing of income. ○ Determine the concept related to deduction of gross income. ○ Integrate the concept of income tax authorizes.

Logistics	II	Marketing and Sales Management	R20COML203	2022-23	<ul style="list-style-type: none"> ○ Articulate the fundamental concepts and functions of marketing. ○ Extrapolate the knowledge on market segmentation and consumer behavior. ○ Optimize the basic concept of market mix and product policy. ○ Expose the knowledge towards channel of distribution in the market. ○ Interpret the role and importance of modern trend in marketing.
BBA	II	Accounting for Managers	R20BBA201	2022-23	<ul style="list-style-type: none"> ○ Understanding the nature and purpose of financial statement ○ Journalize the ability to rectify the errors in bank reconciliation statement. ○ Develop the ability to use accounting concepts and principles ○ Applying the use of the fundamental

					<p>accounting equation to analyze the effect of business transactions in an organization</p> <ul style="list-style-type: none"> ○ To provide knowledge about procedure of issue of shares
BBA	II	Fundamentals of Marketing	R20BBA202	2022-23	<ul style="list-style-type: none"> ○ Articulate the fundamental concepts and functions of marketing. ○ Extrapolate the knowledge on product life cycle. ○ Optimize the basic concept of pricing strategies ○ Optimize the basic concept of promotion mix and product policy ○ Implement financial initiatives based on consumer behavior and fixation of the price.
BBA	II	e-Commerce	R20BBA203	2022-23	<ul style="list-style-type: none"> ○ To gain strong knowledge on basic commerce courses. ○ To understand the unique features of e-Commerce environment. ○ To impart entrepreneurial capabilities required for e-businesses ○ To encourage overall academic development of students to pursue higher studies or to take up employment. ○ To gain knowledge on ethical values of e-business environment.
B.Com. General	III	Advanced	R20COM301	2022-	<ul style="list-style-type: none"> ○ To develop the skill of preparing income and

TP Computers Logistics		Accounting		23	<p>expenditure account and balance sheet of an organization with the help of given receipts and payments account and additional information.</p> <ul style="list-style-type: none"> ○ To understand the difference between Single Entry and Double Entry System. ○ To gain basic knowledge of hire purchase transactions and its applicability in practical life. ○ To develop the skill of valuation of goodwill using different methods. ○ To develop the application skills to apply Garner Vs. Murray rule at the time of insolvency of a partner.
B.Com. General TP Computers Logistics	III	Business Statistics	R20COM302	2022- 23	<ul style="list-style-type: none"> ○ To describe and discuss the key terminology, concepts tools and techniques used in business statistical analysis. ○ To apply discrete and continuous probability distributions to some business problems. ○ To calculate and apply some measures of location and measures of dispersion for grouped and ungrouped data. ○ To know the complementary relationship of skewness with measures of central tendency and dispersion in describing a set of data. ○ To describe how correlation is used to identify relationships between variables and describe how regression analysis is used to predict outcomes.

B.Com. General	III	Marketing	R20COMG303	2022-23	<ul style="list-style-type: none"> ○ To describe a range of common strategies for use with each of the various Marketing mix tools: product, pricing, promotion and distribution. ○ To understand the role of psychology and the study of consumer behavior and understand the market segmentation, needs, motivation and measurement of motives. ○ Make product marketing decisions based on product life cycle and Explain key strategies for developing brands including brand ownership, brand and line extensions. ○ Understand pricing strategies to enhance marketing of products and services and identify how price affects the value of the organization's products or services. ○ Learn how to develop effective messaging for marketing communications and understand how channels affect the marketing of products and services
B.Com. TP	III	Indian Banking System	R20COMT303	2022-23	<ul style="list-style-type: none"> ○ Get enriched with the knowledge of functioning of banks and helps them realize the role of banks. ○ Apply the imparted knowledge about functions, role and monetary policy of Reserve Bank of India. ○ Understand the Payment Systems and Electronic Banking like ATMs, HWAK; PIN; Electromagnetic Cards Recent Developments

					<p>in India</p> <ul style="list-style-type: none"> ○ Gain knowledge regarding different types of banks in India. ○ Understand the general and special relationship between banker and customer in various capacities.
B.Com. Logistics	III	Material Management	R20COML303	2022-23	<ul style="list-style-type: none"> ○ Develop a sound understanding of the important role of logistics and supply chain management in today's business environment. ○ Understand the categorization of inventories using various techniques and optimize the efficiency of warehouse operations. ○ Understand the usage of different material handling equipment in Industry. ○ To devise purchase procedures, inspection methods, storing and issuing procedures, common to all materials in a class. ○ Describe the need and role of codification, standardisation and simplification of materials from the viewpoint of the functions of planning, control, ○ purchases, inventory, stores, etc.
BBA	III	Organisation Behaviour	R20BBA301	2022-23	<ul style="list-style-type: none"> ○ Explain the concept of Organisation Design and determine the factors that affect Organisation Design. ○ Identify the components of Individual Behaviour and apply the concept of Learning, Perception, Attitudes and values. ○ Analyse the behaviour of individuals and

					<p>groups in organisations in terms of the key factors that influence organisational behaviour and demonstrate skills required for working in groups.</p> <ul style="list-style-type: none"> ○ Justify how organizational change and conflict affect working relationships within organizations and demonstrate how to apply relevant theories to solve problems of change and conflict within organizations.
BBA	III	Human Resource Management	R20BBA302	2022-23	<ul style="list-style-type: none"> ○ To study the objectives and functions of Human resource management. ○ To understand the concept of Human resource planning and HRP process and job analysis. ○ Lime lighting the selection process, recruitment and training development. ○ Develop Employability skills and contribute to employee performance management and organizational effectiveness ○ Identify and evaluate social, cultural, ethical and environmental responsibilities and issues in global contexts.
BBA	III	Financial Management	R20BBA303	2022-23	<ul style="list-style-type: none"> ○ Recognize the importance of financial management from a strategic perspective. ○ Enable the students to evaluate the capital budgets through capital budgeting techniques. ○ Impart deeper understanding in working capital management to avail the adequate working capital for business functions. ○ Analyze the capital structure decisions through

					<p>relevant models.</p> <ul style="list-style-type: none"> ○ Discuss the dividend policy of a firm.
BCA	III	Accounting and Financial Management	R20BCA301	2022-23	<ul style="list-style-type: none"> ○ Acquire the knowledge in accounting, system of maintenance of accounts, journal, ledger, and understand the basic accounting concepts and conventions, preparation of subsidiary books and final accounts. ○ Exemplify to prepare and analyse the financial statements. ○ Students would calculate the various ratios and would be able to discuss the significance and use of the various ratios and be able to prepare cash flow statements using indirect method. ○ To understand t the preparation of cost sheet and classification of costs. ○ Learn the process of preparing various types of budgets and understand the break-even analysis, working capital management, capital budgeting techniques.
B.Com. General TP Computers Logistics BBA BCA	III	Environmental Education	R20LSC304	2022-23	<ul style="list-style-type: none"> ○ Give information about the environment and the resources to act at our own level to protect them. ○ Analyse the roles of organisms as part of interconnected food webs, populations, communities, and ecosystems. ○ Understand the scale dependence of biodiversity and its measurement. ○ Learn how to assess pollution sources, study

					<p>exposure pathways and fate, and evaluate consequences of human exposure to pollution and its impacts to environmental quality.</p> <ul style="list-style-type: none"> ○ Balance our economic, environmental and social needs, allowing prosperity for now and future generations.
B.Com. General TP Computers Logistics	IV	Corporate Accounting	R20COM401	2022- 23	<ul style="list-style-type: none"> ○ Familiarise with the rules relating to issues of shares and debentures. ○ Familiarise with the rules relating to underwriting of shares ○ Make aware of computation of the financial results of companies ○ Prepare Investments account ○ Become familiar with computation of Insurance claims
B.Com. General TP Computers Logistics	IV	Cost and Management Accounting	R20COM402	2022- 23	<ul style="list-style-type: none"> ○ Understand various costing systems and management systems ○ Analyse and provide recommendations to improve the operations of organisations through the application of Cost and Management accounting techniques ○ Evaluate the costs and benefits of different conventional and contemporary costing systems ○ Differentiate methods of schedule costs as per unit of production ○ Differentiate methods of calculating stock consumption
B.Com. General	IV	Business Laws	R20COM403	2022-	<ul style="list-style-type: none"> ○ Demonstrate an understanding of the Legal

TP Computers Logistics				23	<p>Environment of Business.</p> <ul style="list-style-type: none"> ○ Communicate effectively using standard business and legal terminology. ○ Demonstrate recognition of the requirements of the contract agreement ○ Demonstrate understanding of contract consideration and capacity ○ Demonstrate recognition of the genuineness of assent in contract formation.
B.Com. General TP Logistics	IV	Auditing	R20COM404	2022- 23	<ul style="list-style-type: none"> ○ Understand the environment and types relating to the auditing function ○ Identify the steps needed to prepare for an audit ○ Understand general audit terminology ○ Plan an audit taking into account concepts of evidence, risk and materiality ○ Know the steps for performing an audit
B.Com. General TP Logistics	IV	Goods and Services Tax	R20COM405	2022- 23	<ul style="list-style-type: none"> ○ Provide knowledge about goods service tax ○ Create employability to the students in the commercial tax practices ○ Understand the procedure for registration, payment and refund of GST ○ Know tax procedures for movement of goods ○ Understand the appeals, offences and penalties with respect to GST
B.Com. General TP Logistics	IV	Income Tax	R20COM406	2022- 23	<ul style="list-style-type: none"> ○ Collect the basic concepts and definitions of Income Tax Act 1961 ○ Know the residential status of assessee and incomes exempted from tax

					<ul style="list-style-type: none"> ○ Become familiar with the computations of income from salary, income from house property ,income from business and profession
B.Com. TP	IV	Assessment of Individual, HUF & Partnership	R20COMT406	2022-23	<ul style="list-style-type: none"> ○ Acquire the complete knowledge of the tax evasion, tax avoidance and tax planning ○ Understand the provisions and compute income tax for various sources ○ Grasp amendments made from time to time in Finance Act ○ Compute total income and define tax complications and structure ○ Prepare and File IT returns of individual at his own.
B.Com. Logistics	IV	Distribution Management	R20COML406	2022-23	<ul style="list-style-type: none"> ○ Understand the roles and responsibilities of sales function ○ Manage the channel efficiency and effectiveness ○ Manage and enhance the sales force productivity and performance ○ Plan and implement an effective sales strategy for their organizations ○ Frame socially, legally and ethically acceptable policies and plans for Marketing channels
BBA	IV	Training and Development	R20BBA401	2022-23	<ul style="list-style-type: none"> ○ Develop an understanding of the evolution of training & development from a tactical to a strategic function . ○ Provide an insight into what motivates adults to learn and the most appropriate methodologies to impart training

					<ul style="list-style-type: none"> ○ Understand the concept of training audit & training evaluation ○ Learn to design a training module and execute it ○ Understand the need to learn the concept of Performance Management
BBA	IV	Business Laws	R20BBA402	2022-23	<ul style="list-style-type: none"> ○ Demonstrate an understanding of the Legal Environment of Business. ○ Communicate effectively using standard business and legal terminology. ○ Demonstrate recognition of the requirements of the contract agreement ○ Demonstrate understanding of contract consideration and capacity ○ Demonstrate recognition of the genuineness of assent in contract formation.
BBA	IV	Micro, Small and Medium Enterprises Management	R20BBA403	2022-23	<ul style="list-style-type: none"> ○ Explain basic concepts of SME and challenges of MSMEs. ○ Outline the opportunities to Set-Up SSI/SME Units and role of rural & women entrepreneurship. ○ Illustrate roles of various institutions supporting MSMEs. ○ Manage MSME, NPA & sickness units. ○ Evaluate role of Government in Promoting Entrepreneurship
BBA	IV	International Business	R20BBA404	2022-23	<ul style="list-style-type: none"> ○ Understand various concepts and terminologies involved in International Business and importance of international trade

					<ul style="list-style-type: none"> ○ Evaluate various modes of entry in to International business and should be able to select the best mode of entry given a situation. ○ Relate and discuss the presence of macro factors (PESTEL) on international business environment ○ Examine and elaborate the role of various Government institutions in India which support International trade. ○ Perceive the concepts in recent EXIM policy of India and relate it to the flow of FDI as well as direction of Indian foreign trade.
BBA	IV	Cost and Management Accounting	R20BBA405	2022-23	<ul style="list-style-type: none"> ○ Understand various costing systems and management systems ○ Analyse and provide recommendations to improve the operations of organisations through the application of Cost and Management accounting techniques ○ Evaluate the costs and benefits of different conventional and contemporary costing systems ○ Differentiate methods of schedule costs as per unit of production ○ Differentiate methods of calculating stock consumption
BBA	IV	Financial Services	R20BBA406	2022-23	<ul style="list-style-type: none"> ○ Competence in Oral, Written and visual Communication. ○ Demonstrate critical and innovative thinking. ○ Communicate ethically.

					<ul style="list-style-type: none"> ○ Understand the process of communication and its effect on giving and receiving information. ○ Apply effective communication skills in a variety of public and interpersonal settings.
B.COM COMPUTERS	V	Management Accounting	R20COMC501	2022- 23	<ul style="list-style-type: none"> ○ Understand the basic concepts of management accounting ○ 2 - Understand the analysis of financial statements by using various methods ○ 3- Understand different ratios used for analysing financial Statements ○ 4- Prepare fund flow statement for the business organization ○ 5- Prepare the cash flow statement required for the business
B.COM COMPUTERS	V	Cost Control Techniques	R20COMC502	2022- 23	<ul style="list-style-type: none"> ○ Differentiate cost control, cost reduction concepts and identify effective techniques. ○ Allocate overheads on the basis of Activity Based Costing. ○ Evaluate techniques of cost audit and rules for cost record. ○ Examine about the Standard Costing and Variance analysis ○ To analyse about the various new techniques available for cost control.
B.COM COMPUTERS	V	Advertising and Media Planning	R20COMC503	2022- 23	<ul style="list-style-type: none"> ○ Identify misleading and false advertisements and will also get a general idea about framing advertisements. ○ Acquire copy writing skills and will also be equipped with the ability to choose a

					<p>particular medium for advertisement.</p> <ul style="list-style-type: none"> ○ Decide an appropriate test for measuring the effectiveness of advertisement as they become aware of various tests for measuring the effectiveness of advertisements. ○ Prepare sales promotion budget and the knowledge about various sales promotion strategies may benefit those students who dream of a career in salesmanship. ○ Formulate their own strategies to manage sales force in their client organization
B.COM COMPUTERS	V	Sales Promotion and Practice	R20COMC504	2022- 23	<ul style="list-style-type: none"> ○ Analyse various sales promotion activities ○ Get exposed to new trends in sales Promotion ○ Understand the concepts of creativity in sales promotion ○ Enhance skills to motivate the salesperson to reach their targets ○ Develop the skills of designing of sales promotion events
BBA	V	Stress Management	R20BBA501	2022- 23	<ul style="list-style-type: none"> ○ Describe the relationship between stress, human health, behavior's, and perceptions. ○ Recognize signs and symptoms of stress. ○ Summarize the physiological response to stress and how it impacts human health. ○ Identify stressors and possible root causes using health models. ○ Evaluate the effectiveness of stress management strategies and relaxation techniques on a personal level.

BBA	V	Performance Management	R20BBA502	2022-23	<ul style="list-style-type: none"> ○ Understand the Theory, Concept & Good practices in the area of PMS. Also understand & appreciate the “Strategic Importance” of PMS in any Organisation. ○ Design an organization’s performance management process that is compliant with law and supports organizational mission and strategy. ○ Compare and contrast various organizational performance management programs and best practices and define attributes of effective performance management systems. ○ Employ job-related performance standards and performance indicators that reflect the employee’s range of responsibilities. ○ Assess how increased employee involvement can contribute to effective performance and coach employees to identify career paths and resources available to support individual development.
BBA	V	Sale Promotion and Practice	R20BBA503	2022-23	<ul style="list-style-type: none"> ○ Analyse various sales promotion activities ○ Get exposed to new trends in sales Promotion ○ Understand the concepts of creativity in sales promotion ○ Enhance skills to motivate the salesperson to reach their targets ○ Develop the skills of designing of sales promotion events
BBA	V	E-Business	R20BBA504	2022-	<ul style="list-style-type: none"> ○ Recognize the e-business concepts and how it

				23	<p>is different from e-commerce.</p> <ul style="list-style-type: none"> ○ Recognize the e-business models and infrastructure and learn to apply these e-business concepts in different fields. ○ Analyze the potential impacts of different e-Business strategies; the ability to evaluate the effects of business issues in relation to various e-Business models. ○ Have awareness of the e-Business environment, the identification of contemporary e-Business issues, and the evaluation of their implications for organizations.
BBA	V	Foreign Exchange Management	R20BBA505	2022-23	<ul style="list-style-type: none"> ○ Prepare to understand with foreign exchange market structure, market dealings. ○ Understand the functions and players in the foreign exchange market. ○ Understand the various forex exposures ○ Gain knowledge to manage the exchange exposures ○ Learn the forward and spot market operations
BBA	V	E-Payment System	R20BBA506	2022-23	<ul style="list-style-type: none"> ○ Understand the basic concepts and technologies used in the field of management information systems; ○ Have the knowledge of the different types of management information systems; ○ Understand the processes of developing and implementing information systems; ○ Be aware of the ethical, social, and security

					<p>issues of information systems;</p> <ul style="list-style-type: none"> ○ Describe the risks, mediations, and controls related to various payment types, payment channels, and systems.
B.Com. General Logistics	VI	Advanced Corporate Accounting	R20COMG601/R20COML601	2022-23	<ul style="list-style-type: none"> ○ Construct the financial statements of company within the frame work ○ Develop a process for redemption of Preference shares ○ Construct the Restructuring of capital structure in the financial statement of Joint stock company ltd. ○ Calibrate the procedure involved in Amalgamation of companies ○ Calibrate the procedure involved in Absorption of companies
B.Com. General Logistics	VI	Software Solutions to Accounting	R20COMG602/R20COML602	2022-23	<ul style="list-style-type: none"> ○ Understand the technical environment of accounting softwares. ○ Highlight the major accounting softwares in India. ○ Apply basics of accounting softwares into business firms for accounting transactions ○ Understand about the Tally and Stock markets in practical. ○ Examine about the Tally voucher Entry.
B.Com.TP	VI	Management Accounting	R20COMT601	2022-23	<ul style="list-style-type: none"> ○ Provide a basic knowledge about management accounting concepts ○ Understand use the different types of ratios ○ Describe the method of preparing the cash

					<p>flow statement as per AS-7 and fundflow statement</p> <ul style="list-style-type: none"> ○ Understand the basic concept of budget and its type ○ Understand the basic concept of marginal cost

					<p>for economic development too.</p> <ul style="list-style-type: none"> ▪ Break down the accounting process and system through accounting equations so as to analyze the classifications of revenues and expenses. ▪ 3. Understand the financial statement analysis, and use tools and techniques to analyse and interpret the key parameters of financial performance ▪ 4. Discover how balance sheets, income statements, and cash flow statements are developed and how each one is interpreted ▪ 5. Prepare and evaluate financial forecasts to make strategic decisions
I MBA	I	BUSINESS ANALYTICS FOR DECISION MAKING	R22MBA105	2022-2023	<ul style="list-style-type: none"> ▪ Define statistics, become aware of wide range of applications in statistics, types of data, tabulation of data and construct a histogram, frequency polygon, an ogive, pie chart. ▪ Apply various measures of central tendency –mean, median, mode, GM and H.M for grouped and ungrouped data. Apply various measures of variability-range, MD, QD and standard deviation. ▪ Understand the concepts of probability and its applications in business ▪ 4. Understand the various discrete and continuous probability distributions ▪ Apply the concepts of various decisions

					making environments and its uses in solving business decision making process.
I MBA	I	MANAGERIAL COMMUNICATIONS	R22MBA106	2022-2023	<ul style="list-style-type: none"> ▪ Understand communication skills and sensitize them to their potential to become successful managers ▪ Explain the various types of communication in Business Organizations. ▪ Help them acquire some of the necessary skills to handle day-to-day managerial responsibilities, such as making speeches, controlling one-to-one communication, enriching group activities and processes, giving effective presentations, writing letters, memos, minutes, reports and advertising, and maintaining one's poise in private and in public ▪ Identify the role of communication conflict in intercultural relationships. ▪ Analyzing the communication styles of successful managers in India
I MBA	I	PERSONALITY DEVELOPMENT THROUGH LIFE ENHANCEMENT SKILLS	R22MBA107	2022-2023	<ul style="list-style-type: none"> ▪ Develop their personality and achieve their highest goals of life. ▪ Lead the nation and mankind to peace and prosperity ▪ Practice emotional self-regulation. ▪ Develop a positive approach to work and duties ▪ Develop a versatile personality

I MBA	I	MS EXCEL & ACCOUNTING TALLY	R22MBA108	2022- 2023	<ul style="list-style-type: none"> ▪ Use different options in MS- Excel ▪ Acquire Hands on experience on Ms – Excel Utilities ▪ Create Solutions for data management & reporting ▪ Enter financial data in Tally, and interpret the financial results obtained from Tally ▪ Know how to use Tally & GST Applications for various business purposes.
I MBA	II	MARKETING MANAGEMENT	R22MBA201	2022- 2023	<ul style="list-style-type: none"> ▪ Formulate a Marketing plan for meeting the needs of the customer in the society ▪ Relate Marketing Mix as a frame work for marketing Decision - Making ▪ Formulate Marketing Communication to convince the customers ▪ Understand the marketing channel system for promoting products in the market ▪ Understand the need, importance and process of marketing planning & control.
I MBA	II	HUMAN RESOURCES MANAGEMENT	R22MBA202	2022- 2023	<ul style="list-style-type: none"> ▪ Understand the role of HRM in an organization ▪ Familiar with different Recruitment & Selection process in the organization ▪ Develop & Design Training methods for the organization ▪ Understand the performance appraisal methods of organizations ▪ Gain Knowledge about Grievance procedures in the organization

					<ul style="list-style-type: none"> ▪ Understand the different dimensions in Quality of work life ▪ Understand different payment systems in different organizations. ▪ Know the different elements in HR Audit.
I MBA	II	FINANCIAL MANAGEMENT	R22MBA203	2022-2023	<ul style="list-style-type: none"> ▪ Students can understand the different concepts relates to financial management ▪ Develop & Design Training methods for the organization ▪ Use finance theory/ concepts, techniques and models for qualitative and quantitative analysis. ▪ Communicate complex financial information and analysis effectively both in speaking and writing. ▪ Apply financial knowledge/skills and an ethical compass to guide business decisions in academic simulations or real-world professional environments. ▪ Formulate financial management solutions based on qualitative and quantitate analysis.
I MBA	II	ENTREPRENEURSHIP & SMALL BUSINESS	R22MBA204	2022-2023	<ul style="list-style-type: none"> ▪ Develop an understanding of entrepreneurship and small business and appreciate their role in an economy, particularly in the Indian economy ▪ Analyze the entrepreneurial process through which business ideas are

					<p>evaluated;</p> <ul style="list-style-type: none"> ▪ Distinguish between business ideas and opportunities; and ▪ Examine entrepreneurial potential ▪ Learn Preparation of detailed Project report for starting new business ▪ Understand the different Business challenges faced in society.
I MBA	II	RESEARCH METHODOLOG Y & IPR	R22MBA205	2022- 2023	<ul style="list-style-type: none"> ▪ Understand some basic concepts of research and its methodologies ▪ Demonstrate the ability to choose methods appropriate to research aims and objectives ▪ Have basic awareness of data analysis- and hypothesis testing procedures ▪ File Patents, Trademarks and Copy Rights ▪ Have adequate knowledge on measurement & scaling techniques .
I MBA	II	OPERATION RESEARCH	R22MBA206	2022- 2023	<ul style="list-style-type: none"> ▪ Solve linear programming problems using appropriate techniques and optimization solvers, interpret the results obtained. ▪ Determine optimal strategy for Minimization of Cost of shipping of products from source to Destination/ Maximization of profits of shipping products using various methods, Finding initial basic feasible and optimal solution of the Transportation problems ▪ Optimize the allocation of resources to Demand points in the best possible way

					<p>using various techniques and minimize the cost or time of completion of number of jobs by number of persons.</p> <ul style="list-style-type: none"> ▪ Model competitive real-world phenomena using concepts from game theory. Analyse pure and mixed strategy games ▪ Formulate Network models for service and manufacturing systems, and apply operations research techniques and algorithms to solve these Network problems
I MBA	II	LEADERSHIP & CHANGE MANAGEMENT	R22MBA207	2022- 2023	<ul style="list-style-type: none"> ▪ Gain knowledge and leadership skills to help organizations chart a successful course through change ▪ Understand the link between effective leadership strategies and successful implementation of change; ▪ Plan and implement organizational changes by applying effective methodologies ▪ Understand to effectively lead others through change ▪ Describe the role of leadership in anticipating and planning readiness and navigating organizational change.
I MBA	II	CONSUMER BEHAVIOUR	R22MBA207(ii)	2022- 2023	<ul style="list-style-type: none"> ▪ Understand the consumer behaviour in the market. ▪ Apply consumer behaviour concepts to real world marketing problems and develop better marketing programs and strategies to influence those behaviours

					<ul style="list-style-type: none"> ▪ Understand how consumer behaviour affected by the family & other trends. ▪ Get awareness about different models of consumer behaviour in the market. ▪ Different approaches for convincing the customer in the market. ▪ Pricing Strategies for meeting the consumer needs in the market. ▪ Distribution channels of Consumer behaviour in the present market scenario.
I MBA	II	COST & MANAGEMENT ACCOUNTING	R22MBA207(iii)	2022-2023	<ul style="list-style-type: none"> ▪ Understand the basic concepts in management accounting ▪ Apply various methods and techniques of management and cost accounting to optimize the utilization of the resources ▪ Formulate the budgets and interpret the results produced by the applied models. ▪ Application of Marginal costing to managerial decision making. ▪ Preparation of Functional budget for operational & non operational Functions.
I MBA	II	SELLING & NEGOTIATION SKILLS	R22MBA208	2022-2023	<ul style="list-style-type: none"> ▪ Understand the appreciation skills and competencies required to be an effective sales person ▪ Learn negotiation skills in the market ▪ Perform different selling techniques for convincing the customers ▪ Develop the Problem solving skills for negotiation

					<ul style="list-style-type: none"> ▪ Prepare sales Demonstration.
II MBA	III	STRATEGIC MANAGEMENT	R20MBA301	2021- 2022	<ul style="list-style-type: none"> ▪ Understand the different strategies applied for business. ▪ Applications of Different strategies in the business scenario ▪ Learn how to convince the customers in marketing ▪ Develop different strategies for the development of business ▪ Understand issues faced by managers and top management in the process of strategy implementation.
II MBA	III	PROJECT MANAGEMENT	R20MBA302	2021- 2022	<ul style="list-style-type: none"> ▪ Prepare Project report for business proposals ▪ Provide with a holistic, integrative view of Project Management ▪ Analyse Different Project Models for development of business. ▪ Prepare Project cost estimation and budget for various business proposals. ▪ Learn the project evaluation and other techniques for completion of different project. ▪ 6. Sensitize the complexities of project management.
		CONSUMER BEHAVIOUR AND MARKETING	R20MBA303 MKT		<ul style="list-style-type: none"> ▪ Define the conception of consumer behaviour and reveal its importance in the context of marketing. ▪ Identify factors that influence consumer

II MBA	III	RESEARCH		2021-2022	<p>behaviour.</p> <ul style="list-style-type: none"> ▪ Understand Applications of Individual determinants of consumer behaviour ▪ Understand marketing research and its process. ▪ Explore applications of marketing research.
II MBA	III	SERVICES MARKETING	R20MBA304 MKT	2021-2022	<ul style="list-style-type: none"> ▪ Understand the different concepts in services marketing ▪ Analyse various factors influencing consumer behaviour ▪ Analyse the various expectations customer towards services of different companies ▪ Apply different services models for satisfying the customer needs in the market. ▪ Maintain the customer relationship management in services marketing ▪ Analyse services marketing Mix for every service provided by the company. ▪ Understand the maintaining service quality in services.
II MBA	III	PRODUCT AND BRAND MANAGEMENT	R20MBA305 MKT	2021-2022	<ul style="list-style-type: none"> ▪ Understand the product and product concepts ▪ Develop the product planning process for business. ▪ Making product decisions for selling various products in the market ▪ Learn of using the Product Mix Decisions according to conditions of market

					<ul style="list-style-type: none"> ▪ Understand the various concepts of brand in the market. ▪ Know the importance of brand value with respect to the product ▪ Analyse the brand values for various products ▪ Understand the methods of measuring the brand performance in the market.
II MBA	III	INTEGRATED MARKETING COMMUNICATI ONS	R20MBA306MKT	2021- 2022	<ul style="list-style-type: none"> ▪ Understand concept of Integrated marketing Communication and process of communication ▪ Explore planning for marketing communication. ▪ Explain measuring the effectiveness of all Promotional tools and IMC. ▪ Explain media and digital advertising ▪ Understand the various models of communication.
II MBA	III	HUMAN RESOURCES PLANNING	R20MBA303HRM	2021- 2022	<ul style="list-style-type: none"> ▪ Learn about the importance of HR planning in the organization ▪ Study of this course makes the student learn about HR information system ▪ Design career prospectus for human resources planning. ▪ Learn to retain talented pool of employees in the organization. ▪ Understand the various models of HRP.
		PERFORMANCE	R20MBA304HRM		<ul style="list-style-type: none"> ▪ Understand the performance reward

II MBA	III	REWARD MANAGEMENT		2021- 2022	<p>management systems in the organization</p> <ul style="list-style-type: none"> ▪ Evaluate various Performance methods to describe employees performances in the organization ▪ Learn to prepare the HR Score card for employee performance ▪ Understand the different performance criteria to evaluate employee performances ▪ Understand various performances incentives and schemes provided by the organization.
II MBA	III	TRAINING & DEVELOPMENT	R20MBA305HRM	2021- 2022	<ul style="list-style-type: none"> ▪ Understand the need and importance of training in the organization ▪ Evaluate the different training methods available in the organization ▪ Understand the significance of development programmes in the organization ▪ Emphasis on different training methods evaluation ▪ Learn to prepare the training programme schedules in the organization.
II MBA	III	ORGANIZATIO NAL CHANGE & DEVELOPMENT	R20MBA306HRM	2021- 2022	<ul style="list-style-type: none"> ▪ Learn about managing change in organizations ▪ Get acquainted with OD interventions, techniques and approaches involved in OD. ▪ Understand the organizational dynamics ▪ acquire knowledge about different

					<p>organizations perspectives</p> <ul style="list-style-type: none"> ▪ Understand the different factors affecting the organization development.

DEPARTMENT OF MCA

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
MCA	I	Programming and Problem Solving Using Python	R22MCA101	2022-23	<ul style="list-style-type: none"> ▪ Understand computer architecture and data representations (variables, representation of numbers and character strings). ▪ Learn basic algorithmic problem, solving techniques (decision structures, loops, functions). ▪ Use and understand objects used in programming. ▪ Design, document, implement and test solutions to programming problems. ▪ Identify and repair coding errors in a program.
MCA	I	Data Structures	R22MCA102	2022-23	<ul style="list-style-type: none"> ▪ Ability to select the data structures that efficiently model the information in a problem.

					<ul style="list-style-type: none"> ▪ Ability to assess efficiency trade offs among different data structure implementations or combinations. ▪ Implement and know the application of algorithms for sorting and pattern matching. ▪ Design programs using a variety of data structures, including hash tables ▪ Binary and general tree structures, search trees, , graphs, and AVL trees
MCA	I	Mathematical and Statistical Foundations	R22MCA103	2022-23	<ul style="list-style-type: none"> ▪ Apply the basic rules and theorems of probability theory such as Baye’s Theorem ▪ Determine probabilities that help to solve engineering problems and to determine the expectation and variance of a random variable from its distribution. ▪ Able to perform and analyze of sampling, means, proportions, variances and estimates the maximum likelihood based on population parameters. ▪ Learn how to formulate and test hypotheses about sample means, variances and proportions andto draw conclusions based on the results of statistical tests. ▪ Design various ciphers using number theory
MCA	I	Operating Systems	R22MCA104	2022-23	<ul style="list-style-type: none"> ▪ Understand fundamental operating system abstractions such as processes, threads, files, semaphores,

					<ul style="list-style-type: none"> ▪ IPC abstractions, shared memory regions, etc., ▪ Analyze important algorithms eg. Process scheduling and memory management algorithms. ▪ Categorize the operating system's resource management techniques, dead lock management techniques, ▪ memory management techniques
MCA	I	Personality Development through Life Enlightenment Skills	R22MCA105	2022-23	<p>At the end of this course the students should be able to:</p> <ul style="list-style-type: none"> ▪ Develop their personality and achieve their highest goals of life. ▪ Lead the nation and mankind to peace and prosperity ▪ Practice emotional self-regulation. ▪ Develop a positive approach to work and duties ▪ Develop a versatile personality
MCA	II	Software Engineering and Design Patterns	R22MCA201	2022-23	<ul style="list-style-type: none"> ▪ Gain knowledge on the concepts of Software Engineering requirements, analysis and design. ▪ Understand different life cycle models. ▪ Known the concept of object oriented paradigm . ▪ Understand the working of software Architecture ▪ Understand their design patterns

MCA	II	Database Management Systems	R22MCA202	2022-23	<ul style="list-style-type: none"> ▪ Learn the concepts of databases and database users. ▪ Learn the basics of normalization. ▪ Learn entity relationship models. ▪ To understand the relational algebra and relational calculus. ▪ To know Querying, Creating, Updating & Deleting documents in SQL
MCA	II	Computer Networks	R22MCA203	2022-23	<ul style="list-style-type: none"> ▪ Understand and describe the layered protocol model. ▪ Describe, analyse and evaluate a number of data link, network, and transport layer protocols. ▪ Program network communication services for client/server and other application layouts. ▪ Describe, analyse and evaluate various related technical, administrative and social aspects of specific computer network protocols from standards documents and other primary materials found through research. ▪ Design, analyse, and evaluate networks and services for homes, data centres, IoT/loE, LANs and WANs
MCA	II	Research Methodology & Intellectual Property Rights	R22MCA204	2022-23	<ul style="list-style-type: none"> ▪ Understand some basic concepts of research and its methodologies ▪ Identify appropriate research topics ▪ Select and define appropriate research

		(IPR)			<ul style="list-style-type: none"> ▪ problem and parameters ▪ Demonstrate the ability to choose methods appropriate to research aims and objectives ▪ Have adequate knowledge on measurement & scaling techniques ▪ Have basic awareness of data analysis-and hypothesis testing procedure ▪ Prepare a project proposal (to undertake a project) ▪ Write a research report and thesis ▪ File Patents, Trademarks and Copy Rights
MCA	II	Design and Analysis of Algorithms	R22MCA205E1	2022-23	<ul style="list-style-type: none"> ▪ Understand the basic notation for analyzing the performance of the algorithms. ▪ Use divide-and-conquer techniques for solving suitable problems ▪ Use greedy approach to solve an appropriate problem for optimal solution. ▪ Apply dynamic programming approach to solve suitable problems ▪ Understand the limitations of algorithm power and study how to cope with the limitations of algorithm power
MCA	II	Data Warehousing and Data Mining	R22MCA205E2	2022-23	<ul style="list-style-type: none"> ▪ Understand the basics of types of data, quality of data, suitable techniques required for preprocessing and measures required to perform data analysis ▪ Describe the need of classification, identify suitable technique(s) to perform classification, model building and

					<p>evaluation</p> <ul style="list-style-type: none"> ▪ Identify the requirements and usage of association rule mining on categorical and continuous data. ▪ Compare and Identify suitable clustering algorithm(s) (apply with open source tools), interpret, evaluate and report the result ▪ Describe the requirements and the need of web mining
MCA	II	Cloud Computing	R22MCA205E3	2022-23	<ul style="list-style-type: none"> ▪ core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics. ▪ advantages and challenges brought about by the various models and services in cloud computing. ▪ Apply the fundamental concepts in data centers to understand the trade offs in power, Efficiency and cost. ▪ Identify resource management fundamentals, i.e. resource abstraction, sharing and Sandboxing and outline their role in managing infrastructure in cloud computing. ▪ Analyze various cloud programming models and apply them to solve problems on the cloud
MCA	III	BIG DATA ANALYTICS	R20MCA301	2020-21	<ul style="list-style-type: none"> ▪ Ability to identify the characteristics of datasets and compare the trivial data and bigdata for various applications.

					<ul style="list-style-type: none"> ▪ Ability to select and implement machine learning techniques and computing environment that are suitable for the applications under consideration. ▪ Ability to solve problems associated with batch learning and online learning, ▪ Big data characteristics such as high dimensionality, dynamically growing data and in particular scalability issues ▪ Ability to understand and apply scaling up machine learning techniques and associated computing techniques and technologies.
MCA	III	MOBILE COMPUTING	R20MCA302	2020-21	<ul style="list-style-type: none"> ▪ Students will be able to analyse modelling and simulation of various communication networks. ▪ Students will be able to generate test and estimate parameters. ▪ Students will apply this knowledge for detection estimation ▪ Simulation of various communication networks. ▪ Gain the knowledge about various types of Wireless Data Networks and wireless Voice Networks
MCA	III	ARTIFICIAL INTELLIGENCE	R20MCA303	2020-21	<ul style="list-style-type: none"> ▪ Find appropriate idealizations for converting real world problems into AI search problems formulated using the appropriate search algorithm.

					<ul style="list-style-type: none"> ▪ Implement A* and iterative deepening search. ▪ Derive Heuristic functions for A* search that are appropriate for a given problem. ▪ It is expected that the learners select and apply a variety of graph search algorithms underpinning AI applications. ▪ It is expected that the students to apply techniques to design expert systems.
MCA	III	CLOUD COMPUTING	R20MCA304a	2020-21	<ul style="list-style-type: none"> ▪ Articulate the main concepts, key technologies, strengths, and limitations of cloud computing and ▪ Possible applications for state-of-the-art cloud computing ▪ Identify the architecture and infrastructure of cloud computing, including SaaS, PaaS, IaaS, public cloud, private cloud, hybrid cloud, etc. ▪ Explain the core issues of cloud computing such as security, privacy, and interoperability. ▪ Choose the appropriate technologies, algorithms, and approaches for the related issues.
MCA	III	INTERNET OF THINGS	R20MCA304b	2020-21	<ul style="list-style-type: none"> ▪ Evaluate the appropriate protocol for communication between IoT ▪ Analyse the communication protocols for IoT ▪ Able to understand the application areas of

					<p>IOT</p> <ul style="list-style-type: none"> ▪ Able to realize the revolution of Internet in Mobile Devices ▪ Able to realize the revolution of Internet in Cloud & Sensor Networks
MCA	III	MACHINE LEARNING	R20MCA304c	2020-21	<ul style="list-style-type: none"> ▪ Have a good understanding of the fundamental issues and challenges of machine learning: data, model Selection, model complexity, etc. ▪ Have an understanding of the strengths and weaknesses of many popular machine learning approaches. ▪ Appreciate the underlying mathematical relationships within and across Machine Learning algorithms ▪ Paradigms of supervised and un-supervised learning. ▪ Be able to design and implement various machine learning algorithms in a range of real-world applications
MCA	III	DISTRIBUTED COMPUTING	R20MCA304d	2020-21	<ul style="list-style-type: none"> ▪ Able to provide hardware and software issues in modern distributed systems. ▪ Get knowledge in distributed architecture, naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems. ▪ Analyse the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed.

					<ul style="list-style-type: none"> ▪ Know about Shared Memory Techniques. ▪ Able to research and commercial distributed systems.
MCA	III	SOFTWARE TESTING AND FAULT ANALYSIS	R20MCA305a	2020-21	<ul style="list-style-type: none"> ▪ List a range of different software testing techniques and strategies ▪ Able to apply specific(automated) unit testing method to the projects. ▪ Distinguish characteristics of structural testing methods. ▪ Demonstrate the integration testing which aims to uncover interaction ▪ Compatibility problems as early as possible <p>1.</p>
MCA	III	DNA COMPUTING	R20MCA305b	2020-21	<ul style="list-style-type: none"> ▪ Able to provide hardware and software issues in modern distributed systems. ▪ Get knowledge in DNA, RNA, naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems. ▪ Analyse the current popular distributed systems such as peer-to-peer (P2P) systems will also be analyzed. ▪ Know about Shared Cryptography Techniques. ▪ Able to research and commercial distributed systems. <p>2.</p>
MCA	III	SOFTWARE PROJECT	R20MCA305c	2020-21	<ul style="list-style-type: none"> ▪ Identify the different project contexts and suggest an appropriate management

		MANAGEMENT			<p>strategy.</p> <ul style="list-style-type: none"> ▪ Practice the role of professional ethics in successful software development. ▪ Identify and describe the key phases of project management. ▪ Determine an appropriate project management approach through an evaluation of the business context ▪ Determine scope of the project. <p>3.</p>
MCA	IV	Java Full Stack Development	R20MCA405	2022-23	<ul style="list-style-type: none"> ▪ The Student will be able to design Web Application using Data base ▪ The Student will be able to understand the installation of MongoDB ▪ Able to understand the connection using Python ▪ Able to create web applications ▪ Able to set the connections
MCA	IV	DATA SCIENCE USING PYTHON	R20MCA403	2020-21	<ul style="list-style-type: none"> ▪ The Student will understand the objects ▪ Understand Data Interpretation using Numpy ▪ The Student will understand the objects and Data Interpretation using Pandas ▪ The Student will understand Graphs using Matplotlib ▪ The Student will understand the Machine learning models using sklearn
MCA	IV	CRYPTOGRAPHY & NETWORK	R20MCA406	2022-23	<ul style="list-style-type: none"> ▪ The student will be able to Understand Message Authentication

		SECURITY			<ul style="list-style-type: none">▪ To make the students understand the basics of Pretty good Privacy▪ To make the students understand the Integration of Digital Signature▪ To make the students understand the Kerberos▪ To make the students understand the concepts of privacy

DEPARTMENT OF PG CHEMISTRY

Class	Semester	Title of the Course	Course Code	W.E.F	Course Outcomes
I M.Sc (OCH/ACH)	I	General Chemistry	R22OCH/ACH101	2022-23	<ol style="list-style-type: none">1. Could able to process the analytical Data and could learn how to minimise errors in chemical experiments.2.Acquire skill on different titrations for quantitative determinations and on choice of indicators in titrations.3.Could aware on the Batch extraction, continuous extraction and counter current extraction and their applications.4. Understand the process of natural product isolation.5. Understand the concept of chromatography and develops the separation techniques for a mixture of organic molecules and drug materials through chromatographic technique.
I M.Sc (OCH/ACH)	I	Organic Chemistry	R22OCH/ACH102	2022-23	<ol style="list-style-type: none">1. Apply the concepts of bonding, resonance, aromaticity, hyperconjugation and tautomerism to higher organic compounds.2. Predict the products, identify reaction intermediates and propose suitable mechanism for organic reactions.3. Identify stereogenic centres, recognize enantiomers, diastereomers, meso compounds, draw stereochemical structures, and provide R/S designations of stereocenters.4. Apply the concepts of substitution, addition and elimination reactions to some synthetic organic reactions.5. Design reactions with the help of name reactions and rearrangements and use of suitable reagents. <p style="text-align: center;">KBN COLLEGE (AUTONOMOUS), KOTHAPETA, VIJAYAWADA</p>

I M.Sc (OCH/ACH)	I	Inorganic Chemistry-1	R22OCH/ACH103	2022-23	<ol style="list-style-type: none">1. Understand the d-orbital splitting pattern in different geometries like
------------------	---	-----------------------	---------------	---------	----------------------------------------------------------------------------------------------------------------------------

H)					<p>octahedral, tetrahedral.</p> <ol style="list-style-type: none"> 2. Calculate magnetic moment & crystal field stabilization energy of metal complexes. 3. Explain high spin and low spin complexes & formation of metal complexes in solution. 4. Understand HSAB rule, chelation, macro cyclic, cryptate effect. 5. Determine stability constant of particular complex through pH metry , polagraphic methods etc •
I M.Sc (OCH/ACH)	I	Physical Chemistry-1	R22OCH/ACH1 04	2022-23	<ol style="list-style-type: none"> 1. The basic principles of quantum mechanics. Introduction to new operators such as Hermitian and Hamiltonian and their use in the solution of Hydrogen and Hydrogen like atoms. 2. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties. 3. Define and explain surface and interfacial phenomenon. 4. Correlate electrochemistry with thermodynamics that will enable to get best output from industrial perspective. 5. Understand the concept of activation energy and its calculation from kinetic data.
I M.Sc (OCH/ACH)	I	Personality Development through life Enlightenment Skills	R22OCH/ACH1 05	2022-23	<ol style="list-style-type: none"> 1. Develop their personality and achieve their highest goals of life. 2. Lead the nation and mankind to peace and prosperity 3. Practice emotional self regulation. 4. Develop a positive approach to work and duties 5. Develop a versatile personality.
I M.Sc (OCH/ACH)	II	ORGANIC SPECTROSCOPY	R22OCH/ACH2 01	2022-23	<ol style="list-style-type: none"> 1. Understand basic concepts of organic spectroscopy. 2. Calculate the λ_{max} value of organic molecules by Woodward rules.

H)		PY			<p>3. Learn the fundamentals of instrumentation of UV, IR, NMR and mass.</p> <p>4. Analysis of organic molecules by different spectroscopic techniques.</p> <p>5. Do fragmentation pattern (analysis) of organic molecules by using mass spectrometry.</p>
I M.Sc (OCH/ACH) H)	II	Physical Chemistry-II	R22OCH/ACH2 02	2022- 23	<p>1. Recognize symmetry elements, identify point groups of molecules, construct and explain character table for simple molecules.</p> <p>2. Categorize molecules based on their symmetry properties and predict their molecular properties.</p> <p>3. Combine, evaluate and interpret information from the various spectroscopic techniques in determination of molecular structures.</p> <p>4. Account for the physical interpretation of partition functions and be able to calculate thermodynamic properties of model systems with using Boltzmann -, Fermi-Dirac and Bose-Einstein statistics.</p> <p>5. Account for the physical interpretation of distribution functions and discuss and show how these can be used in calculations of basic thermodynamic properties.</p> <p>6. Explain fundamental aspects of electrochemical reaction in terms of thermodynamics, and kinetics.</p>
I M.Sc (OCH/ACH) H)	II	Inorganic Chemistry-II	R22OCH/ACH2 03	2022- 23	<p>1. Understand the classification of clusters and different structural patterns of metal clusters.</p> <p>2. Discuss how ligand substitution reaction takes place in octahedral and square- planar, trans effect and trans influence and how trans effect is applicable in synthesis of different metal complexes.</p> <p>3. Interpret the magnetic properties of transition metal complexes based on magnetic measurements.</p> <p>4. Discuss terms, state & microstate & Orgel diagram and calculate microstate & terms of different configurations.</p> <p>5. Explain how metal ions take part in biological system and their concentration effect and physiological effect on biological system.</p>

I M.Sc (OCH/ACH)	II	Research Methodology	R22OCH/ACH2 04	2022- 23	<ol style="list-style-type: none"> 1. Understand the formulation of Research problems. 2. Collect and prepare suitable data for research. 3. Design experiments for different statistical Concepts. 4. Write research proposals and reports. 5. Apply their research work for patent through IPR.
I M.Sc (OCH/ACH)	II	Chemistry of Bioorganic compounds	R22OCH/ACH2 06	2022- 23	<ol style="list-style-type: none"> 1. Understand the stereochemistry of carbohydrates and their reactions. 2. Learn the molecular structures of 20 amino acids, differentiating essential and non-essential amino acids, biologically important modified amino acids and their functions. 3. Understand the difference between the water soluble and fat soluble vitamins and their key role in the metabolism as coenzymes. 4. Relate the structure of DNA with its function in Replication and gene expression that include both transcription and translation. 5. Describe what happens: - when lipids are metabolized, cholesterol, prostaglandins etc. are synthesized, emphasizing the genetic defects of lipid metabolism.
II M.Sc (ACH)	III	Separation methods	R20ACH301	2020- 21	<ol style="list-style-type: none"> 1. Classify separation methods based on the underlying principles, such as differences in physical properties or chemical interactions. 2. Explore the principles of adsorption and partitioning as separation mechanisms. 3. Study chromatographic techniques, including gas chromatography (GC), liquid chromatography (LC), and thin-layer chromatography (TLC). 4. Learn the principles and applications of column chromatography for the separation of compounds. 5. Explore the use of HPLC for the separation and quantification of analytes in complex mixtures. 6. Study gel electrophoresis and capillary electrophoresis as techniques

					<p>for separating biomolecules based on charge and size.</p> <p>7. Become familiar with the instrumentation used in separation methods, including detectors and data acquisition systems.</p>
II M.Sc (ACH)	III	Spectroscopic Methods	R20ACH302	2020-21	<ol style="list-style-type: none"> 1. Advanced knowledge about the interactions of electromagnetic radiation and matter and their applications in organic spectroscopy to elucidate the structure of the organic compounds. 2. Learn the factors affecting ^{13}C NMR chemical shifts 3. Identify functional groups using IR, λ_{max} for polyenes and α, β-unsaturated carbonyl compounds. 4. Interpret Cotton effect curves for obtaining absolute configuration of chiral molecules with chromophores. 5. Determine chemical structure by UV-Vis, IR, ^1HNMR, ^{13}CNMR and mass spectral data.
II M.Sc (ACH)	III	Applied Analysis	R20ACH303	2020-21	<ol style="list-style-type: none"> 1. Understand chemical analysis methods, such as titration, gravimetric analysis, and spectrophotometry, used to quantify metal content in Fe, Mn and Al ores. 2. Learn methods for quantifying nutrient content in fertilizers, including nitrogen, phosphorus, and potassium analysis. 3. Understand calorimetry and combustion analysis methods to determine the energy content and composition of fuels. 4. Learn methods for analyzing the chemical composition of cement, including the determination of major and minor components.. 5. Study analytical methods to determine the composition of paints, including pigments, binders, solvents, and additives. 6. Integrate knowledge from various areas of chemistry and materials science to perform accurate and reliable analyses.
II M.Sc (ACH)	III	Instrumental methods of	R20ACH304	2020-21	<ol style="list-style-type: none"> 1. Understand the principles and applications of amperometry for monitoring current at a constant applied potential.

		Analysis			<ol style="list-style-type: none"> 2. Explore techniques such as cyclic voltammetry, square wave voltammetry, and differential pulse voltammetry for qualitative and quantitative analysis. 3. Understand the basic principles of coulometric analysis, including Faraday's laws of electrolysis and Perform coulometric titrations and calculate analyte concentrations using Faraday's laws. 4. Identify the types of analytes suitable for polarographic analysis and their electrochemical behaviour and learn various polarographic techniques, such as direct current (DC), differential pulse (DP), and square wave (SW) polarography. 5. Explore the application of thermal analysis in characterizing polymers, pharmaceuticals, ceramics, and other materials. 6. Learn how to atomize samples in a flame and convert them into free atoms for analysis. 7. Apply flame photometry for the quantitative determination of specific elements, such as sodium, potassium, and calcium.
II M.Sc (ACH)	IV	Green Chemistry	R20ACH402.2	2020-21	<ol style="list-style-type: none"> 1. Define the principles and concepts of green chemistry, including the 12 principles of green chemistry outlined by Anastas and Warner. 2. Evaluate the environmental and health impacts of chemical processes and products, and identify ways to reduce or eliminate these impacts. 3. Demonstrate knowledge of safer and more sustainable methods for chemical synthesis, including solvent selection, reaction conditions, and waste reduction. 4. Compare and contrast the use of alternative solvents and reaction media (e.g., ionic liquids, supercritical fluids) for green chemistry applications. 5. Describe the importance of catalysis in green chemistry and identify green catalytic processes.

					6. Develop strategies for waste minimization and recycling in chemical processes.
II M.Sc (ACH)	IV	Traditional and Environmental Methods of Analysis	R20ACH403.1	2020- 21	<ol style="list-style-type: none"> 1. Understand the fundamental principles of decomposition techniques in chemical analysis and recognize the importance of decomposition in breaking down complex samples into analytically manageable components. 2. Master acid digestion methods for decomposing samples and solubilizing analytes and Study alkaline hydrolysis techniques for breaking down complex organic molecules. 3. Understand the fundamental principles of organic functional group analysis and its importance in organic chemistry and Understand how knowledge of functional groups contributes to the determination of molecular structure and compound identification. 4. Understand the fundamental principles of drug analysis and its significance in pharmaceutical science. 5. Study chromatographic techniques, including high-performance liquid chromatography (HPLC) and gas chromatography (GC), used for drug analysis. 6. Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry and Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry.

		Quality Control and Standard			<ol style="list-style-type: none"> 1. Familiarize yourself with the ISO (International Organization for Standardization) standards relevant to your industry. 2. Learn the importance of accurate record keeping and documentation in quality control, including laboratory notebooks, standard operating procedures (SOPs), and batch records. 3. Understand the principles of QA and its role in maintaining consistent product quality.
Class M.Sc (ACH)	Semester IV	Title of the Course Methods of Analysis	Course Code R20ACH404	W.E.F 2020- 21	Course Outcomes <ol style="list-style-type: none"> 4. Study the chemistry behind the formation of precipitates and the conditions that favor their formation. . 5. Master techniques for isolating and collecting precipitates from solution. . 6. Learn about various filtration methods, including gravity filtration, vacuum filtration, and microfiltration. 7. Understand sample digestion techniques for converting analytes into a suitable form for precipitation.

M.Sc. Analytical Chemistry:

Explore the application of thermal analysis in characterizing polymers, pharmaceuticals, ceramics, and other materials. 3. Learn how to atomize samples in a flame and convert them into free atoms for analysis. 4. Apply flame photometry for the quantitative determination of specific elements, such as sodium, potassium, and calcium.
II M.Sc (ACH)	IV	Green Chemistry	R20ACH402.2	2020- 21	<ol style="list-style-type: none"> 1. Define the principles and concepts of green chemistry, including the 12 principles of green chemistry outlined by Anastas and Warner. 2. Evaluate the environmental and health impacts of chemical processes and products, and identify ways to reduce or eliminate these impacts. 3. Demonstrate knowledge of safer and more sustainable methods for chemical synthesis, including solvent selection, reaction conditions, and waste reduction. 4. Compare and contrast the use of alternative solvents and reaction media (e.g., ionic liquids, supercritical fluids) for green chemistry applications. 5. Describe the importance of catalysis in green chemistry and identify green catalytic processes. 6. Develop strategies for waste minimization and recycling in chemical processes.

II M.Sc (ACH)	IV	Traditional and Environmenta I Methods of Analysis	R20ACH403.1	2020- 21	<ul style="list-style-type: none"> . Understand the fundamental principles of decomposition techniques in chemical analysis and recognize the importance of decomposition in breaking down complex samples into analytically manageable components. . Master acid digestion methods for decomposing samples and solubilizing analytes and Study alkaline hydrolysis techniques for breaking down complex organic molecules. . Understand the fundamental principles of organic functional group analysis and its importance in organic chemistry and Understand how knowledge of functional groups contributes to the determination of molecular structure and compound identification. 0. Understand the fundamental principles of drug analysis and its significance in pharmaceutical science. 1. Study chromatographic techniques, including high-performance liquid chromatography (HPLC) and gas chromatography (GC), used for drug analysis. 2. Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry and Explore techniques for measuring electrical conductivity and pH as indicators of water chemistry.
II M.Sc (ACH)	IV	Quality Control and Standard Methods of Analysis	R20ACH404	2020- 21	<ul style="list-style-type: none"> . Familiarize yourself with the ISO (International Organization for Standardization) standards relevant to your industry. . Learn the importance of accurate record keeping and documentation in quality control, including laboratory notebooks, standard operating procedures (SOPs), and batch records. 0. Understand the principles of QA and its role in maintaining consistent product quality. 1. Study the chemistry behind the formation of precipitates and the conditions that favor their formation. . 2. Master techniques for isolating and collecting precipitates from solution. .

					<ol style="list-style-type: none">3. Learn about various filtration methods, including gravity filtration, vacuum filtration, and microfiltration.4. Understand sample digestion techniques for converting analytes into a suitable form for precipitation.
