

DEPARTMENT OF MBA
INDUSTRY CONSULTANCY WITH VILAN APPARELS (P)
LTD.,

The PG Dept of Business Administration has come up with a novel idea of industry consultancy services from the academic year 2017-19. Under this activity the students of MBA class are divided into teams, each consists of six members. Each team will be under the mentoring of one faculty member. The consultancy groups will approach the clients from industry to render their services in terms of business ideas, novel methods of promotion of business etc.

Idea is to turn our students into consultants and changing clients for the privilege of receiving their advice. Turning students into consultants is not just cost – effective, it makes full use of their ‘unconstrained’ minds.

Under the model, the groups of management graduates work for client from industry make money and work their way up to permanent jobs. While the clients have a pool of student consultants services at a fraction of price they would pay to hire professionals.

We firmly believe that, we got a set of students whose mind really is not constrained yet by some of the perspectives they develop during the course curriculum, they might have more of an open mind in suggesting solutions. Working with corporate clients will surely ensure them to extent their relationships with management.

The objectives of the programme are:

- a. To encourage the students to come out with novel ideas.
- b. To stimulate the students to identify their potential skills and use them in ways that benefits corporate clients and earn money for them.
- c. To mentor the students to take up consultancy work and execute it to meet the expectation of the clients.
- d. To groom the students into future managers equipped with necessary competencies to meet the demands of the corporate world.

We approached the local corporate houses to start with and we are getting encouragement from them. Sri Chandra Sekhar.T, Managing Director of Vilan Apparels Private Ltd., was impressed with our initiative and collaborated with us to get the services of our students. He paid Rs 90000/- towards the fee for consultancy services of the student consultants. The project commenced in the month of March 2018 and continue till March

2019. During the period the student consultant teams will work on generating business ideas for the client.

We will be continuing our endeavours to add more clientele and ensure that our students will get more benefit in terms of enhanced creative thinking, project execution, management and advisory skills.
