Internet of Things (IOT) plays an important role in the digitized world. IOT is shaping human life with greater connectivity and ultimate functionality through networking to the internet. The IOT holds the promise of improving people's lives through both automation and augmentation. Recently, IOT technologies have made their entrance into the healthcare domain. It is now providing many opportunities to develop Smart healthcare solutions with more intelligent and prediction capabilities both for daily life (home/office) and in-hospitals.

Our Management KBN has started a new course for the very first time that is B.Sc. Iot in our College in Vijayawada, also in the Entire Krishna dt. The aim of our management is provide Campus selection at the end of this course in a reputed companies or industries.

Keeping this in mind the Department of Physics & Electronics arranged a guest lecture on IoT on 23rd October 2018 with Sri. Prakash Kaja, CEO, SAADRUSO TECHNOLOGY, VENTURES, and Pvt. Ltd, Bangalore. For I B.Sc. MECS and ME IoT Students and Career Counselling. The entire talk is about Applications of Internet of things.

What is IOT, and how internet of things works, current status and future prospect of IOT, Knowledge management from DATA to Wisdom, the future of IOT and the potential of IOT and the Applications of IOT, Challenges and controversies of IOT.

All Developing countries demands Smart Cities, for the smart cities to be built they need an Expert in IOT. And after this he has cleared all the doubts asked to him by the Students.
