REPORT:

Earth day celebrations were conducted on 22 nd April, 2022 in the department of zoology. Competition conducted between the B.Sc (CBZ) students. Students participated and won the prizes in elocution on biodiversity and its importance. Principal and vice principal participated in this event and distributed the prizes.

Objectives of Earth day:

1. To save the environment
2. To reduce the environmental pollution
3. To create the public awareness on the environmental issues

4. To sustainable use of the natural resources.
5. To create the awareness of our mother earth.

Importance of Earth day:

Earth Day is probably the biggest co-ordinated expression of support for the environment in the world. Events are co-ordinated globally by the Earth Day Network in more than 190 countries. According to Wikipedia, it has become "the largest secular holiday in the world, celebrated by more than a billion people every year". That is an astonishing achievement. The year 2020 was the 50th Anniversary of Earth Day and celebrations included a variety of activities such as the Great Global CleanUp, Citizen Science, Advocacy, Education, and art. Due to the pandemic many of these activities moved online and they included three-day livestream event, Earth Day Live, organized by coalition of youth activists, which focused on; citizen science, volunteering, community engagement, education, and the role of art in furthering the cause.

OUPUT OF THE PROGRAMME

Students get awareness on why we are celebrating the world earth day and how we can protect the earth from the different global environmental issues and how to protect the earth from different artificial man made pollutions. Students got the very good awareness of mother earth.
