“Research Opportunities for Lifesciences in IIT’s”

“Prof. Abhijith Das”

IIT, Khargpur
On
9th February, 2019

Inviting the Guest by Dr. V. Subhashini, Head,
Dept. of Zoology

Prof. Abhijith, Associate Prof. in the Neuro Epigenetics Lab of
IIT, Khargpur interacted with students about PG Courses in

Student queries

Felicitation to Prof. Abhijith

REPORT

A Guest Lecture is organized in “Research Opportunities for Life Sciences in IIT’s on 9th February, 2019. The Resource Person is Prof. Abhijith Das presently working as Associate Prof. in the Neuro Epigenetics Lab of IIT, Khargpur.

He inspired and motivated the students towards the research while communicating with them. He told them that in his lab they are using fruit fly (*Drosophila*) model system. They are studying how change in chromatin is mechanically associated with developmental and behavioural principles and how their mis-regulation leads to diseases. He also expressed his views about responses to oxidative stress, brain injury and wound healing. The students are much excited and they asked some questions for which the Resource Person answered patiently. Sri Abhijith Das was felicitated by the students.
