Observing/ Identifying the Sparrows in and around Vijayawada

Awareness Programme on
“Conservation of Sparrows”

(In view of World Sparrows Day)

Organized by

Department of Zoology

20th March, 2018

REPORT

An awareness programme on “Save the Sparrows” is organized by the Department of Zoology on 20th March, 2019 in view of World Sparrows Day. In this programme students are made aware of the importance of sparrows in the life of human beings. The students are asked to spot the sparrows in the vicinity of the college campus and their house and take their photographs. After spotting the sparrows they are asked to provide nests, food grains and water bowls, so that sparrows will not leave the place of their habitat.

The habitat of sparrows will be noted in the citizen sparrow under the name of KBN College. This year on March 20th students of I CBZ expressed their views on Save the Sparrows Programme. They are much inspired and promised to take the programme to the outsiders also.
